commercial production and consumption can be aligned with artistic authenticity Reading pop texts takes place through dialogue on many levels which as Stan Hawkins argues deals with how musical events are shaped by personal alliances between the artist and the recipient The need for a critical approach to evaluating popular music lies at the heart of this book Hawkins explores the relationships that exist between music spectatorship and aesthetics through a series of case studies of pop artists from the 1980s and 1990s Madonna Morrissey Annie Lennox the Pet Shop Boys and Prince represent the diversity of cultures identities and sexualities that characterised the start of the MTV boom Through the interpretation of aspects of the compositional design and musical structures of songs by these pop artists Hawkins suggests ways in which stylistic and technical elements of the music relate to identity formation and its political motivations Settling the Pop Score examines the role of irony and empathy the question of gender race and sexuality and the relevance of textual analysis to the study of popular music Interpreting pop music within the framework of musicology Hawkins helps us to understand the pleasure so many people derive from these songs
