Stern, Liselotte Bendix Stern, 2013-05-13 The culmination of over three decades of investigation into traumatic processes Repetition and Trauma is the late Max Stern s pioneering reconceptualization of trauma in the light of recent insights into the physiology and psychology of stress and the teleonomic character of human evolution in developing defenses against shock As such it is a highly original attempt to reformulate certain basic tenets of psychoanalysis with the findings of modern biology in general and neurobiology in particular At the core of Stern s effort is the integration of laboratory research into sleep and dreaming so as to clarify the meaning of pavor nocturnus In concluding that these night terrors represent a defense against stress caused by threatening nightmares he exploits though he interpretively departs from the laboratory research on dreams conducted by Charles Fisher and others in the 1960s From his understanding of

pavor nocturnus as a compulsion to repeat in the service of overcoming a developmental failure to attribute meaning to states of tension Stern enlarges his inquiry to the phenomena of repetitive dreams in general In a brilliant reconstruction of Freud's Beyond the Pleasure Principle he suggests that Freud was correct in attributing the repetitive phenomena of traumatic dreams to forces operating beyond the pleasure principle but holds that these phenomena can be best illumined in terms of Freud's conception of mastery and Stern's own notion of reparative mastery Encyclopedia of Neuroscience, Volume 1 Larry R. Squire, 2009-06-12 The Encyclopedia of the Neuroscience explores all areas of the discipline in its focused entries on a wide variety of topics in neurology neurosurgery psychiatry and other related areas of neuroscience Each article is written by an expert in that specific domain and peer reviewed by the advisory board before acceptance into the encyclopedia Each article contains a glossary introduction a reference section and cross references to other related encyclopedia articles Written at a level suitable for university undergraduates the breadth and depth of coverage will appeal beyond undergraduates to professionals and academics in related fields *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1983 *Research Grants Index* National Institutes of Health (U.S.). Division of Research Grants, 1972 **Do Both Psychopathology and Creativity Result from a Labile Wake-Sleep-Dream Cycle?** Sue Llewellyn, Martin Desseilles, 2017-12-05 Laypeople think of wake sleep and dreaming as distinct states of the mind brain but in between hybrid states are recognized For example day dreaming or more scientifically the default network occurs during wake Equally during sleep lucid dreaming in rapid eye movement REM sleep presents as another hybrid state But hybrid states are usually temporary This book explores the possibility of an enduring hybrid wake sleep dream state proposing that such a state may engender both creativity and psychopathologies REM sleep is hyper associative Creativity depends on making remote associations If REM sleep and dreaming begin to suffuse the wake state enhanced creativity may result But moderate to severe interpenetration of wake sleep and dreaming may engender psychopathologies as the functions of wake sleep and dreaming are partially eroded Psychopharmacology, a Review of Progress, 1957-1967 National Institutes of Health (U.S.), 1957 **Psychopharmacology; a Review of Progress, 1957-1967** American College of Neuropsychopharmacology, 1968 Classic Readings in Psychology James V.
