Latour, 1999-06-30 A scientist friend asked Bruno Latour point blank Do you believe in reality Taken aback by this strange query Latour offers his meticulous response in Pandora's Hope It is a remarkable argument for understanding the reality of science in practical terms In this book Latour identified by Richard Rorty as the new bête noire of the science worshipers gives us his most philosophically informed book since Science in Action Through case studies of scientists in the Amazon analyzing soil and in Pasteur's lab studying the fermentation of lactic acid he shows us the myriad steps by which events in the material world are transformed into items of scientific knowledge Through many examples in the world of technology we see how the material and human worlds come together and are reciprocally transformed in this process Why Latour asks did the idea of an independent reality free of human interaction emerge in the first place His answer to this question harking back to the debates between Might and Right narrated by Plato points to the real stakes in the so called science wars the perplexed submission of ordinary people before the warring forces of claimants to the ultimate truth **Introducing**

Philosophy for Children Through the Secondary Curriculum Lizzy Lewis, Nick Chandley, 2012-05-31 Philosophy for Children P4C is an approach to learning and teaching that aims to develop reasoning and judgement. Students learn to listen to and respect their peers' opinions, think creatively and work together to develop a deeper understanding of concepts central to their own lives and the subjects they are studying. With the teacher adopting the role of facilitator, a true community develops in which rich and meaningful dialogue results in enquiry of the highest order. Each chapter is written by a leading P4C expert and provides an introduction to the relationship between P4C and the subject area, lesson stimuli and activities for extending and deepening students' thinking. The book includes guidance on how to embed P4C in curriculum subjects in a crowded and demanding secondary curriculum timetable, troubleshooting advice for the teacher-turned-facilitator, a companion website containing useful links, downloadable resources and material to display on your interactive whiteboard. Edited and collated by the UK's leading P4C organisation, this book introduces a rationale for using and adapting P4C in the secondary curriculum.

The Coldest Blood Jim Kelly, 2007-01-09 A man lies hidden in an abandoned boat. Stifling his own screams, he draws a knife across his arm, letting the blood flow free. Soon he'll be dead and life can begin again. Three decades later, small-town newspaper reporter Philip Dryden is experiencing a cold, bitter Christmas on the Fens. Dryden's wife Laura is emerging from years in a coma, unsure if she wants to go on living. Meanwhile, people are freezing to death among them. Declan McIlroy, a 39-year-old loner, found dead in his flat with the windows thrown open. The police rule the death a suicide, but Dryden has his doubts, especially when he finds the body of Declan's best friend Joe frozen within a shell of ice on the doorstep of his secluded farmhouse. At the same time, Dryden is investigating allegations of abuse laid against a Catholic orphanage, a touchy subject due to his own Catholic upbringing. The incidents seem unrelated until Dryden discovers that Declan was one of the victims. Could his death have been part of a cover-up? Soon Dryden is picking his way along a disturbing trail of cruelty and betrayal to a brilliantly executed crime and to a chilling half-remembered mystery from his own childhood.

Configuring Internal Controls for Software as a Service Chong Ee, 2018-09-12 This book taps into an inherent paradox: with the ease of reliance on external cloud providers to provide robust functionality and regular enhancements comes their very own audited service organization control (SOC) reports. These are quick to point out the need for client organizations to devise and sustain a system of effective internal controls. By addressing the practitioner in the field, it provides tangible, cost-effective and thus pragmatic means to mitigate key risks whilst leveraging built-in cloud capabilities and overarching principles of effective system design.
