Small Town Nurse:

From Student to Nurse Ida Harper Simpson, Kurt W. Back, 1979-12-12 In this study of student nurses at Duke University Professor Simpson challenges earlier research by demonstrating that a professional school does socialise its students In addition by constructing a model that brings together competing theories of socialisation she finds that socialisation is not necessarily cumulative or unidirectional Conceptualisations that focus on individual students such as those emphasising role modelling student values or peer relations obscure the most significant conditions and processes The program of a school is the fundamental structure of occupational socialisation and this structure not its students should be blamed for failures and praised for success *Public Health Nursing* ,1913 The American Journal of Nursing ,1924
