Making Sense of Our Senses Gr. K-1 , **Engaging Jesus with Our Senses** Jeannine Marie Hanger, 2024-08-27 Jesus took on flesh he was embodied And the Gospels use multisensory language to reveal that his teaching ministry and interactions with people engaged the senses Consider the raging storm on the Sea of Galilee the perfume filling the house as Mary anointed Jesus s feet the significance of touch as Jesus healed people Jesus even described himself in sensory terms as the bread of life the light of the world the vine to whom his disciples are connected Our physical senses are crucial to gaining knowledge of the world around us Yet when it comes to Bible reading we often reduce it to a mere cognitive experience ignoring the Psalmist s invitation to taste and see that the Lord is good This book offers a fresh way to read the Gospels with an emphasis on embodiment focused on a life abiding in Christ The goal is a greater more tangible knowledge of God Jeannine Hanger points to the importance of engaging our physical senses in Bible reading shows an approach to doing so with an emphasis on sparking the imagination and looks at how utilizing our primary senses plays out in reading the Gospels Each chapter includes sensory practices and questions for personal reflection The book includes a foreword by Grant Macaskill **Senses and Your Abilities** Ed Hardy, Sean Hardy, 2008-03 There are many books on the market for the exercise of the body and quite a few on mental exercises This book offers the first everyday exploration on sensory training With trained senses new worlds open up to the reader Colors become brighter Sounds become sweeter Different tastes form

on the palette In essence not only will the user of this book enjoy their reading experience but will gain tangible results from it Senses and Your Abilities is book written in a simple and fluid but highly readable style The guiding principle was that the book be easy to read and a pleasure to read The authors believe this book will be of greatest benefit to anyone unaware of much of the untapped power within their senses This book will help them to unlock those abilities The book will especially appeal to seniors With our increasing lifespans more people are becoming familiar with the tragic consequences on an inactive mind late in life By keeping one s mind alert and constantly busy with new exercises these things may be staved off A wondrous world of sight and sound will unfurl before the more mature readers of this book exciting the brain and the senses on a daily basis Senses and Your Abilities challenges to reader to get off their couch and explore the world around them Whether it is inhaling the scents of homemade brews of tea or paying attention to the shades of colors of parked cars these are exercises that everyone and anyone can perform Most importantly these exercises are simple enough that most can be done in a few minutes so the reader will never get frustrated at lack of results Indeed this book aims to open up the minds of its readers to the amazing processes going on throughout their bodies every time they sniff their coffee or run a hand across a silk shirt This book is up to date and makes use of the latest scientific knowledge on the workings of our brains and senses Senses and Your Abilities is both educational and motivational

Exiled From Our Bodies Tereza Stehlíková, 2025-09-30 In an era where digital devices increasingly mediate our perception of reality this book explores the tension between the richness of direct sensory experience and the allure of the screen It examines how our growing dependence on virtual spaces and visually dominant media has led to a disconnect from our bodies and environment contributing to a sense of alienation both personal and ecological Drawing on an autoethnographic approach artistic research methods and ethnographic interviews with experts across numerous disciplines this book argues for the continuing importance of lived embodied multi sensory experience It considers how the arts rather than merely reinforcing technological mediation can actively subvert the passivity imposed on our subjectivity by the latter offering creative strategies to re engage with the world through all our senses By using artistic processes to navigate the tension between the virtual and the real the book explores how creative practices can generate new ways of seeing feeling and understanding At its core this work suggests that to even begin to address the current environmental crisis we must first return to our bodies and come back to our senses literally and figuratively Through artistic experimentation philosophical inquiry and sensory exploration it proposes a reawakening to the reciprocity between body technology and environment offering a pathway towards a more conscious engaged and aesthetical way of inhabiting the world
