Proctor,2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In **Golden Holocaust** Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes Culture Wars Roger Chapman,2015-03-17 The term culture wars refers to the political and sociological polarisation that has characterised American society the past several decades This new edition provides an enlightening and comprehensive A to Z ready reference now with supporting primary documents on major topics of contemporary importance for students teachers and the general reader It aims to promote understanding and clarification on pertinent topics that too often are not adequately explained or discussed in a balanced context With approximately 640 entries plus more than 120 primary documents supporting both sides of key issues this is a unique and defining work indispensable to informed discussions of the most timely and critical issues facing America today **Environmental Justice** Kristin Shrader-Frechette,2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage

Greaves, 2001 In this lucid and entertaining book Mel Greaves argues that evolutionary biology offers a new perspective that can help us unravel the riddle of cancer Why for example have women always had such a raw deal in the cancer stakes And why are some cancers such as prostate cancer increasing in incidence Greaves argues that Darwinian selection millions of years ago has endowed our genes and cells with inherently cancerous credentials and this is exacerbated by our rapid social evolution and exotic behavioural traits that outpace genetic adaptation The book is full of novel insights the latest scientific discoveries and wonderful historical anecdotes It provides a unique portrait of cancer past present and future      The Advertising Age Encyclopedia of Advertising John McDonough, Karen Egolf, 2015-06-18 For a full list of entries and contributors a generous selection of sample entries and more visit the The Advertising Age Encyclopedia of Advertising website Featuring nearly 600 extensively illustrated entries The Advertising Age Encyclopedia of Advertising provides detailed historic surveys of the world's leading agencies and major advertisers as well as brand and market histories it also profiles the influential men and women in advertising overviews advertising in the major countries of the world covers important issues affecting the field and discusses the key aspects of methodology practice strategy and theory Also includes a color insert      **The Voice of Business** Karen S. Heymann, 2008-04-02 Policymaking in large bureaucracies is hardly a simple process Even the most respected policymakers have to contend with obstacles that seemingly have little to do with the issue at hand office politics work structure and

shifting political environments Yet learning to manage such complex environments is necessary for good policymaking In *Living the Policy Process* Philip Heymann outlines the complex thought processes of policymakers as they struggle to influence both foreign and domestic policy decisions from within the United States government bureaucracy Focusing on three critical situations to illuminate the politics of policy choice the successful attempt to sell missiles to the Mujahideen in Afghanistan in the 1980s the Iran Contra scandal and the FDA's attempt to regulate smoking as well as the efforts to do the same by an outside lobbyist Heymann dissects the intuitive yet rigorous framework that highly skilled policymakers follow to influence government outcomes Throughout he offers detailed accounts of the policy process at work in the Reagan first Bush and Clinton administrations from the cabinet level down to the middle tiers of the federal bureaucracy Heymann deftly describes the shifting real world conditions that government officials face as they struggle to shape the policy agenda Ultimately *Living the Policy Process* offers a clear incisive look at the complex considerations involved from all perspectives with concrete examples and enriches the understanding of the overall policy process for students scholars and practitioners
