Rethinking Islamic Studies Carl W. Ernst, Richard C.

Martin,2012-11-27 A groundbreaking response to the challenges of interpreting Islamic religion in the post 9 11 and post Orientalist era Rethinking Islamic Studies upends scholarly roadblocks in post Orientalist discourse within contemporary Islamic studies and carves fresh inroads toward a robust new understanding of the discipline one that includes religious studies and other politically infused fields of inquiry Editors Carl W Ernst and Richard C Martin along with a distinguished group of scholars map the trajectory of the study of Islam and offer innovative approaches to the theoretical and methodological frameworks that have traditionally dominated the field In the volume s first section the contributors reexamine the underlying notions of modernity in the East and West and allow for the possibility of multiple and incongruent modernities This opens a discussion of fundamentalism as a manifestation of the tensions of modernity in Muslim cultures The second section addresses the volatile character of Islamic religious identity as expressed in religious and political movements at national and local levels In the third section contributors focus on Muslim communities in Asia and examine the formation of religious models and concepts as they appear in this region This study concludes with an afterword by accomplished Islamic studies scholar Bruce B Lawrence reflecting on the evolution of this post Orientalist approach to Islam and placing the volume within existing and emerging scholarship Rethinking Islamic Studies offers original perspectives for the discipline each utilizing the tools of modern academic inquiry to help illuminate contemporary incarnations of Islam for a growing audience of those invested in a sharper understanding of the Muslim world Entangled Knowledge Klaus Hock, Gesa Mackenthun,2012 The intimate relationship between global European expansion since the early modern period and the concurrent beginnings of the scientific revolution has long been acknowledged The contributions in this volume approach the entanglement of science and cultural encounters many of them in colonial settings from a variety of perspectives Historical and historiographical survey essays sketch a transcultural history of knowledge and conduct a critical dialogue between the recent academic fields of Postcolonial Studies and Science a series of case studies explores the topos of Europe s great inventions the scientific exploitation of culturally unfamiliar people and objects the representation of indigenous cultures in discourses of geographical exploration as well as non European scientific practices Entangled Knowledges also refers to the critical practices of scholarship various essays investigate scholarship s own failures in self reflexivity arising from an uncritical appropriation of cultural stereotypes and colonial myths of which the discourse of Orientalism in historiography and residual racist assumptions in modern genetics serve as examples The volume thus contributes to the study of cultural and colonial relations as well as to the history of science and scholarship The Holy Land in Transit Steven Salaita,2006-11-03 Steven Salaita s ambitious and thought provoking work compares the dynamics of settler colonialism in the United States related to Native Americans with the circumstances in Israel related to the Palestinians revealing the way in which politics influences literary production The author s original approach is based not on similarities between the two disparate settler regions but rather on similarities between the rhetoric employed by early colonialists in North America and

that employed by Zionist immigrants in Palestine Meticulously examining histories theories and literary depictions of colonialism and its interethnic dialects Salaita identifies the commonalities in the myths employed by both groups as well as the counter discourse cultivated in the literature of resistance by native peoples He complements his analysis with personal observations of Palestinians in Lebanese refugee camps where he encountered a sympathetic perception of American Indians The Holy Land in Transit presents one of the first intercommunal studies to assess the ways in which indigenous authors react to analogous colonial dynamics With great perception and energy the author offers a fresh contribution to an emerging frame of reference for historical political literary and cultural investigation *The Museum* Samuel J Redman, 2022-05-03 Celebrates the resilience of American cultural institutions in the face of national crises and challenges On an afternoon in January 1865 a roaring fire swept through the Smithsonian Institution Dazed soldiers and worried citizens could only watch as the flames engulfed the museum's castle Rare objects and valuable paintings were destroyed The flames at the Smithsonian were not the first and certainly would not be the last disaster to upend a museum in the United States Beset by challenges ranging from pandemic and war to fire and economic uncertainty museums have sought ways to emerge from crisis periods stronger than before occasionally carving important new paths forward in the process The Museum explores the concepts of crisis as it relates to museums and how these historic institutions have dealt with challenges ranging from depression and war to pandemic and philosophical uncertainty Fires floods and hurricanes have all upended museum plans and forced people to ask difficult questions about American cultural life With chapters exploring World War I and the 1918 influenza pandemic the Great Depression World War II the 1970 Art Strike in New York City and recent controversies in American museums this book takes a new approach to understanding museum history By diving deeper into the changes that emerged from these key challenges Samuel J Redman argues that cultural institutions can and should use their history to prepare for challenges and solidify their identity going forward A captivating examination of crisis moments in US museum history from the early years of the twentieth century to the present day The Museum offers inspiration in the resilience and longevity of America's most prized cultural institutions **Indigenous Archaeologies** Margaret Bruchac, Siobhan Hart, H Martin Wobst, 2016-06-03 This comprehensive reader on indigenous archaeology shows that collaboration has become a key part of archaeology and heritage practice worldwide Collaborative projects and projects directed and conducted by indigenous peoples independently have become standard community concerns are routinely addressed and oral histories are commonly incorporated into research This volume begins with a substantial section on theoretical and philosophical underpinnings then presents key articles from around the globe in sections on Oceania North America Mesoamerica and South America Africa Asia and Europe Editorial introductions to each piece contextualize them in the intersection of archaeology and indigenous studies This major collection is an ideal text for courses in indigenous studies archaeology heritage management and related fields Handbook of Archaeological Theories R. Alexander Bentley, Herbert D. G.

Maschner, Christopher Chippindale, 2007-11-09 This handbook gathers original authoritative articles from leading archaeologists to compile the latest thinking about archaeological theory The authors provide a comprehensive picture of the theoretical foundations by which archaeologists contextualize and analyze their archaeological data Student readers will also gain a sense of the immense power that theory has for building interpretations of the past while recognizing the wonderful archaeological traditions that created it An extensive bibliography is included This volume is the single most important reference for current information on contemporary archaeological theories **American Architecture** Leland M.
