The papers of the first volume are organized in topical sections on P2P based technologies, data mining technologies, XML search and matching, graphs, spatial databases, XML technologies, time series and streams, advanced data mining, query processing, Web sensor networks and communications, information management as well as communities and Web graphs. The second volume contains contributions related to trajectories and moving objects, skyline queries, privacy and security, data streams, similarity search and event processing, storage and advanced topics, industrial demo papers and tutorials and panels. **Skylines and Other Dominance-Based Queries** Apostolos N. Papadopoulos, Eleftherios Tiakas, Theodoros Tzouramanis, Nikolaos Georgiadis, Yannis Manolopoulos, 2022-06-01 This book is a gentle introduction to dominance based query processing techniques and their applications. The book aims to present fundamental as well as some advanced issues in the area in a precise but easy to follow manner. Dominance is an intuitive concept that can be used in many different ways in diverse application domains. The concept of dominance is based on the values of the attributes of each object. An object dominates another object if it is better than. This goodness criterion may differ from one user to another. However, all decisions boil down to the minimization or maximization of attribute values. In this book, we will explore algorithms and applications related to dominance based query processing. The concept of dominance has a long history in finance and multi-criteria optimization. However, the introduction of the concept to the database community in 2001 inspired many researchers to contribute to the area. Therefore, many algorithmic techniques have been proposed for the efficient processing of dominance based queries such as skyline queries, dominant queries and top dominating queries, just to name a few. **Information and Communication Technology for Intelligent Systems (ICTIS 2017) - Volume 1** Suresh Chandra Satapathy, Amit Joshi, 2017-08-07 This volume includes 74 papers presented at ICTIS 2017, Second International Conference on Information and Communication Technology for Intelligent Systems.
