**The Republic of the Southern Cross and other Stories** Valery Yakovlevich Bryusov,2020-09-28 THERE have appeared lately a whole series of descriptions of the dreadful catastrophe which has overtaken the Republic of the Southern Cross They are strikingly various and give many details of a manifestly fantastic and improbable character Evidently the writers of these descriptions have lent a too ready ear to the narratives of the survivors from Star City Zvezdny the inhabitants of which as is common knowledge were all stricken with a psychical distemper For that reason we consider it opportune to give an account here of all the reliable evidence which we have as yet of this tragedy of the Southern Pole The Republic of the Southern Cross came into being some forty years ago as a development from three hundred steel works established in the Southern Polar regions In a circular note sent to each and every Government of the whole world the new state expressed its pretensions to all lands whether mainland or island within the limits of the Antarctic circle as also all

parts of these lands stretching beyond the line It announced its readiness to purchase from the various other states affected the lands which they considered to be under their special protectorate The pretensions of the new Republic did not meet with any opposition on the part of the fifteen great powers of the world Debateable points concerning certain islands lying entirely outside the Polar circle but closely related to the Southern Polar state were settled by special treaties On the fulfilment of the various formalities the Republic of the Southern Cross was received into the family of world states and its representatives were recognised by all Governments The chief city of the Republic having the name of Zvezdny was situated at the actual Pole itself At that imaginary point where the earth's axis passes and all earthly meridians become one stood the Town Hall and the roof with its pointed towers looked upon the nadir of the heavens The streets of the town extended along meridians from the Town Hall and these meridians were intersected by other streets in concentric circles The height of all the buildings was the same as was also their external appearance There were no windows in the walls as all the houses were lit by electricity and the streets were lighted by electricity Because of the severity of the climate an impenetrable and opaque roof had been built over the town with powerful ventilators for a constant change of air These localities of the globe have but one day in six months and one long night also of six months but the streets of Zvezdny were always lighted by a bright and even light In the same way in all seasons of the year the temperature of the streets was kept at one and the same height According to the last census the population of Zvezdny had reached two and a half millions The whole of the remaining population of the Republic numbering fifty millions were concentrated in the neighbourhood of the ports and factories These other points were also marked by the settlement of millions of people in towns which in external characteristics were reminiscent of Zvezdny Thanks to a clever application of electric power the entrance to the local havens remained open all the year round Overhead electric railways connected the most populated parts of the Republic and every day tens of thousands of people and millions of kilogrammes of material passed along these roads from one town to another The interior of the country remained uninhabited Travellers looking out of the train window saw before them only monotonous wildernesses white in winter and overgrown with wretched grass during the three months of summer Wild animals had long since been destroyed and for human beings there was no means of sustenance The more remarkable was the hustling life of the ports and industrial centres In order to give some understanding of the life it is perhaps enough to say that of late years about seven tenths of the whole of the world's output of metal has come from the State mines of the Republic
