Sleep Research Michael H. Chase, 1975 Sleep Research University of California, Davis. Brain Information Service, 1998 *Annual Review of Nursing Research, Volume 19, 2001* Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Nancy Fugate Woods, PhD, RN, FAAN, 2001-05-16 This book demonstrates that nurses have made an important contribution to the advancement and expansion of women's health knowledge. Selecting the health issues of most importance to women, the editors have assembled leading nurse researchers to review, summarize, and critique nursing research within each area. A general overview of the field is also provided. Contributors include Angela McBride, Linda Andrist, Janice Humphreys, and Jacquelyn Campbell. Also contributing are Kathleen MacPherson and Nancy King Reame, nurse members of the original Boston Women's Health Collective, which authors **OUR BODIES OURSELVES** **Annual Review of Nursing Research, Volume 7, 1989** Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Roma Taunton, PhD, Jeanne Benoliel, DNSc, 1989-07-15 Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing Sleep Research Thomas Roth, Michael H. Chase, Carol O'Connor, 1995 Handbook of Sleep Research, 2019-06-21 Handbook of Sleep Research Volume 30 provides a comprehensive review of the current status of the neuroscience of sleep research. It begins with an overview of the neural, hormonal, and genetic mechanisms of sleep and wake regulation, before outlining the various proposed functions of sleep and the role it plays in plasticity and in learning and memory. Finally, the book discusses disorders of sleep and waking, covering both lifestyle factors that cause disrupted sleep and psychiatric and neurological conditions that contribute to disorders. Emphasizes a comparative and multidisciplinary approach to the topic of sleep. Covers the neurobiology and physiology of sleep stages, mechanisms of waking and dreaming. Discusses in detail the proposed functions of sleep from health and rest to memory consolidation and synaptic plasticity. Examines the current state of research in mammalian and non-mammalian species, ranging from primates to invertebrates Annual Review of Nursing Research, Volume 5, 1987 Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Roma Taunton, PhD, 1987-04-15 Now entering its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the profession of nursing **Annual Review of Nursing Research, Volume 17, 1999** Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, 1999-06-03 Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing. Volume 17 focuses on complementary health and pain management and includes chapters by Mariah Snyder, Susan E. Auvil, Novak Donna L. Algase, Beverly J. McElmurry, and Merle H. Mishel *Methodological Issues in Consciousness Research, volume II* Axel Cleeremans, 2025-04-16 This Research Topic is the second volume of the Research Topic Methodological Issues in

Consciousness Research Please see the first volume here The simplest and perhaps the first notion of consciousness in the West as a sentience or awareness of internal or external existence was introduced in the Seventeenth century by the English physician Robert Fludd though similar and even more refined notions of consciousness were developed centuries before in Indian philosophy and contemplative wisdom traditions Because it permeates human existence in so many different ways the study of consciousness is a profoundly interdisciplinary endeavour and engages disciplines such as philosophy including Eastern philosophy cognitive neuroscience anthropology psychiatry and psychopathology and even physics The study of consciousness may involve domains as diverse as perceptual awareness cognition and metacognition reasoning executive control theory of mind self sleep and dreaming emotional competence and empathy It concerns both healthy e g aging meditation spiritual experiences and pathological conditions e g epilepsy neglect and locked in syndromes minimally conscious states anesthesia and involves considerations operating at different time scales e g evolution development expertise Today however and despite almost thirty years of concerted interdisciplinary efforts the nature and mechanisms of consciousness remain as elusive as ever Theoretically different conceptual frameworks aimed at characterizing both its functional and phenomenal aspects take sometimes radically different assumptions as their starting point but often fail to make sufficiently precise differential predictions to be falsifiable While most recent views generally consider methods investigating human higher order reflective or access consciousness the theoretical and experimental foundations of primary proto consciousness often remain vague and ignore evolutionary considerations Influential distinctions such as the distinction between phenomenal and access consciousness between pre reflective minimal and the reflective narrative self between graded and all or none processing or even between conscious and unconscious processing all remain unsettled or controversial The field is also rife with methodological challenges and controversies some of which remain largely unsolved Questions such as how to best measure awareness or to how establish its absence issues such as what kind of neuroscientific data would convincingly make it possible to isolate the neural correlates of consciousness or what types of confounds contaminate extant findings challenges such as how to imagine crucial experiments that are sufficiently sensitive to falsify some theoretical proposals all need to be addressed in open interdisciplinary dialogue This Frontiers Research Topic is aimed at stimulating discussion about current methodological issues and trends in consciousness research We welcome theoretical and empirical contributions as well as empirical articles from both experts and young scientists who work in the field of consciousness research Submissions of related hypotheses original research articles case reports perspectives reviews opinions and commentaries are welcome We very much hope that this Frontiers Research Topic will contribute to enhancing our characterization and understanding of the methodological and conceptual challenges associated with the study of human consciousness

The Sleep of Others and the Transformations of Sleep Research Kenton Kroger, 2007-01-01 We tend to think of sleep as a private concern a night time retreat from the physical world into the realm of the subconscious Yet sleep also has a public side it has been the focal point of religious ritual philosophic speculation political debate psychological research and more recently neuroscientific investigation and medical practice In this first ever history of sleep research Kenton Kroger draws on a wide range of material to present the story of how an investigative field at one time dominated by the study of dreams slowly morphed into a laboratory based discipline The result of this transformation Kroger argues has changed the very meaning of sleep from its earlier conception to an issue for public health and biomedical intervention Examining a vast historical period of 2500 years Kroger separates the problems associated with the history of dreaming from those associated with sleep itself and charts sleep related diseases such as narcolepsy insomnia and sleep apnea He describes the discovery of rapid eye movement REM during the 1950s and shows how this discovery initiated the creation of dream laboratories that later emerged as centres for sleep research during the 1960s and 1970s Kroger s work is unique in subject and scope and will be enormously useful for both sleep researchers medical historians and anybody who s ever lost a night s sleep [Patty's Toxicology, 6 Volume Set](#)

Eula Bingham, Barbara Cohrsen, 2012-07-31 Featuring the improved format used in the 5th edition this updated set presents in logical groupings comprehensive toxicological data for industrial compounds including CAS numbers physical and chemical properties exposure limits and biological tolerance values for occupational exposures making it essential for toxicologists and industrial hygienists This edition has about 40% new authors who have brought a new and international perspective to interpreting industrial toxicology and discusses new subjects such as nanotechnology flavorings and the food industry reactive chemical control to comprehensive chemical policy metalworking fluids and pharmaceuticals

Human Sleep and Cognition G. A. Kerkhof, Hans P. A. Van Dongen, 2010

Annual Review of Nursing Research, Volume 1, 1983 Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Harriet H. Werley, PhD, 1984-01-15 This volume should be quite useful to the target audience It provides a good foundation for evidence based practice and further research 4 stars Doody s Book Review Service The nursing community is continually challenged with expanding the empirical knowledge base that informs rural nursing practice This volume of the prestigious Annual Review of Nursing Research Focus on Rural Health addresses this challenge Contributors have developed creative and effective strategies to identify relevant research and present them in the context of the rural delivery system

The New Dynamics of Ageing Volume 2 Alan Walker, 2018-07-25 This volume and its companion The new dynamics of ageing volume 1 provide comprehensive multi disciplinary overviews of the very latest research on ageing Together they report the outcomes of the most concerted investigation ever undertaken into both the influence shaping the changing nature of ageing and its consequences for individuals and society This book concentrates on four major themes autonomy and independence in later life biology and ageing food and nutrition and representation of old

age Each chapter provides a state of the art topic summary as well as reporting the essential research findings from New Dynamics of Ageing research projects There is a strong emphasis on the practical implications of ageing and how evidence based policies practices and new products can produce individual and societal benefits

Handbook of Psychology and Health, Volume I Robert J. Gatchel, Andrew Baum, Jerome E. Singer, 2021-09-30 Originally published in 1982 this volume deals with behavioral medicine and clinical psychology Much of what psychologists had been able to contribute to the study and treatment of health and illness had to this point been derived from clinical research and behavioral treatment This volume presents some of this work providing a fairly comprehensive view of the overlap between behavioral medicine and clinical psychology Its purpose was to present some of the traditional areas of research and practice in clinical psychology that had directly and indirectly contributed to the development of behavioral medicine Before the birth of behavioral medicine which subsequently attracted psychologists from many different areas ranging from social psychology to operant conditioning the chief link between psychology and medicine consisted of the relationship albeit sometimes fragile and tumultuous between clinical psychology and psychiatry Many of the behavioral assessment and treatment methods now being employed in the field of behavioral medicine were originally developed in the discipline of clinical psychology

The Practice of Sleep Medicine Around The World: Challenges, Knowledge Gaps and Unique Needs Hayr P. Attarian, Marie-Louise M. Coussa-Koniski, Alain Michel Sabri, 2023-03-03 This book explores the different ways sleep medicine is practiced in the world by presenting information from multiple countries from all continents The editors all sleep medicine experts dive into both clinical practice and research keeping an eye on healthcare needs and disparities before proposing solutions The contributions also take into account the social geographical and political situation of each country along with demographic considerations such as income levels adding a dimension of context to the contents The book is meant to be a reference for sleep medicine practitioners who encounter diverse patients in their daily practice It also serves as a good resource for anyone interested in the state of global health studies

Eating, Sleeping, and Sex Albert J. Stunkard, Andrew S. Baum, 2020-03-12 The lack of balance and the failure of regulation in life has traditionally been recognized in such extreme symbolic acts as overconscientiousness or a criminal lack of conscience This volume shows how the neurotic process affects biologic functions distorting natural functioning Three distinct functions and their respective extremes are discussed eating obesity bulimia nervosa sleeping insomnia excessive somnolence and sex hypersexuality including child molestation hyposexuality including inhibited sexual desires

Slow Brain Oscillations of Sleep, Resting State and Vigilance Eus J. W. van Someren, 2011-10-13 This volume of Progress in Brain Research documents research presented at the 26th International Summer School of Brain Research Amsterdam Jun Jul 2010 and looks at how the oscillations that characterize brain activity vary between task performance the EEG power and performance modulations rest the MRI default mode and other networks and sleep the cortical slow oscillations Studies over the past decade indicate that the study of these slow oscillations is

essential for our understanding of plasticity memory brain structure from synapse to default mode network cognition consciousness and ultimately for our understanding of the mechanisms and functions of sleep and vigilance Leading authors review the state of the art in their field of investigation and provide their views and perspectives for future research Chapters are extensively referenced to provide readers with a comprehensive list of resources on the topics covered All chapters include comprehensive background information and are written in a clear form that is also accessible to the non specialist
