Mazzaferri,2012-12-06 Read with two objectives first to acquaint yourself with the current knowledge of a subject and the steps by which it has been reached and secondly and more important read to understand and analyze your cases William Osler The Student Life What follows is a collection of cases or more aptly the stories of our patients and friends who have been seen at The Ohio State University Hospitals where our faculty have provided their care and about whom this volume is written Today many fear that our patients are being moved from center stage while we are being distracted by the technology of medicine This volume was written with patients in mind The idea is that the most intriguing questions and the most rewarding answers begin and end at the bedside This is a story of our patients told by expert clinicians and spiced with commentary along the way This volume in no way at tempts to be comprehensive Instead it is like the practice of medicine scattered somewhat disjointed while at the same time intensely personal and focused upon whatever problem the patient brings to us The discussions are not so much about disease entities

as they are about patients with problem The two are uniquely different For instance when the physician suspects hepatitis not every imaginable cause can be actively investigated Instead tests and procedures are discriminately chosen a part of medicine that is still more art than science
