Cents and Sustainability Michael H. Smith, Karlson Hargroves, Cheryl Desha, 2010 Cents and Sustainability is a clear sighted response to the 1987 call by Dr Gro Brundtland in Our Common Future to achieve a new era of economic growth that is forceful and at the same time socially and environmentally sustainable The Brundtland Report argued that not only was it achievable but that it was an urgent imperative in order to achieve a transition to sustainable development while significantly reducing poverty and driving clean and green investment With some still arguing for significantly slowing economic growth in order to reduce pressures on the environment this new book Cents and Sustainability shows that it is possible to reconcile the need for economic growth and environmental sustainability through a strategy to decouple economic growth from environmental pressures combined with a renewed commitment to achieve significant environmental restoration and poverty reduction Beginning with a brief overview of some of the most pressing environmental challenges of our time the book then explains decoupling theory overviews a number of factors that can undermine and even block efforts to decouple in both developed and developing countries and then discusses a number of key considerations to assist the development of national decoupling strategies The book then focuses on presenting evidence to support greater action not just on climate change but also on decoupling economic growth from the loss of biodiversity and the deterioration of natural systems freshwater extraction waste production and air pollution In the lead up to the 2012 United Nations Earth Summit and beyond Cents and Sustainability will be a crucial guide to inform and assist nations to develop strategies to significantly reduce environmental pressures strengthen their economy create jobs and reduce poverty I commend the team from The Natural Edge Project and their partners for undertaking to develop a response to Our Common Future to mark its 20th anniversary Dr Gro Brundtland Sequel to The Natural Advantage of Nations Published with The Natural Edge Project

Technology and Society, second edition Deborah G. Johnson, Jameson M. Wetmore, 2021-08-24 Writings by thinkers ranging from Rokeya Sakhawat Hossain to Bruno

Latour that focus on the interconnections of technology society and values Technological change does not happen in a vacuum decisions about which technologies to develop fund market and use engage ideas about values as well as calculations of costs and benefits In order to influence the development of technology for the better we must first understand how technology and society are inextricably bound together These writings by thinkers ranging from Bruno Latour to Francis Fukuyama help us do just that examining how people shape technology and how technology shapes people This second edition updates the original significantly offering twenty one new essays along with fifteen from the first edition The book first presents visions of the future that range from technological utopias to cautionary tales and then introduces several major STS theories It examines human and social values and how they are embedded in technological choices and explores the interesting and subtle complexities of the technology society relationship Remedying a gap in earlier theorizing in the field many of the texts illustrate how race and gender are intertwined with technology Finally the book offers a set of readings that focus on the sociotechnical challenges we face today treating topics that include cybersecurity geoengineering and the myth of neutral technology

The Small-Mart Revolution (Volume 2 of 2) (EasyRead Super Large 18pt Edition) , **Hydro** Jamie Swift,Keith Stewart,2004 Nothing is going to go wrong Mike Harris 2001 Privatization of power soon became one of the biggest political disasters in Ontario history Hydro reveals a train wreck that was decades in the making First there was blind faith in the nuclear option steeped in ecological arrogance Then came the promise of marketplace magic Jamie Swift and Keith Stewart tell the tale of how it unfolded It s a dramatic story of the greed intrigue and resistance that led to the dismantling of Canada s largest crown corporation A crucial part of the story is how Ontario ignored thirty years of green arguments for conservation and renewable energy Based on interviews with former premiers Hydro insiders and grassroots activists Hydro will intrigue anyone wondering how to keep the lights on without frying the planet

Renewable Energy Bent Sorensen,2018-12-14 This four volume set edited by a leading expert in the field brings together in one collection a series of papers that have been fundamental to the development of renewable energy as a defined discipline Some of the papers were first published many years ago but they remain classics in their fields and retain their relevance to the understanding of current issues The papers have been selected with the assistance of an eminent international editorial board The set includes a general introduction and each volume is introduced by a new overview essay placing the selected papers in context The range of subject matter is considerable including coverage of all the main renewable technologies the fundamental principles by which they function and the issues around their deployment such as planning integration and socio economic assessment Overall the set provides students teachers and researchers confronted with thousands of journal articles book chapters and grey literature stretching back decades with a ready made selection of and commentary on the most important key writings in renewable energy It will be an essential reference for libraries concerned with energy technology and the environment

Energy and American Society - Thirteen Myths Benjamin K.

Sovacool, Marilyn A. Brown, 2007-05-04 Current events related to energy policy skyrocketing gasoline prices the 2003 Northeast Blackout the Kyoto Protocol's enactment passage of the Energy Policy Act of 2005 and the influence of recent Gulf Coast hurricanes on energy supplies and prices demand innovative approaches towards conceptualizing the relationship between energy and American society This book takes on a central quandary in the study of energy and environmental policy What myths continue to exist in American culture concerning energy the environment and society It enrolls twenty four of the nation's top experts working on energy policy in industry government laboratories utilities nonprofit organizations and universities to debunk and contextualize thirteen energy myths relating to electric power renewable energy energy efficiency transportation and climate change While the book focuses on the American experience it will be of interest to those working in the fields of energy policy energy and the environment and technology assessment worldwide This is a brilliant bold and fascinating book that should be read by anybody even remotely concerned about energy the environment or the future of American society Art Rosenfeld Commissioner California Energy Commission and recipient of the 2006 Enrico Fermi Award This work is a must read for anyone interested in American energy policy Kateri Callahan President Alliance to Save Energy By collecting the best minds to debunk the greatest of these myths Sovacool and Brown have brought us a step closer to finding a national energy policy based on common sense Chris Cooper Executive Director Network for New Energy Choices Sovacool and Brown provide a bold and imaginative way forward John A Skip Laitner Visiting Fellow and Senior Economist American Council for an Energy Efficient Economy Sustainable Fossil Fuels Mark Jaccard, 2006-01-16 More and more people believe we must quickly wean ourselves from fossil fuels oil natural gas and coal to save the planet from environmental catastrophe wars and economic collapse In this 2006 book Professor Jaccard argues that this view is misguided We have the technological capability to use fossil fuels without emitting climate threatening greenhouse gases or other pollutants The transition from conventional oil and gas to their unconventional sources including coal for producing electricity hydrogen and cleaner burning fuels will decrease energy dependence on politically unstable regions In addition our vast fossil fuel resources will be the cheapest source of clean energy for the next century and perhaps longer which is critical for the economic and social development of the world's poorer countries By buying time for increasing energy efficiency developing renewable energy technologies and making nuclear power more attractive fossil fuels will play a key role in humanity's quest for a sustainable energy system **Solar Revolution** Travis Bradford, 2008-09-26 An innovative analysis that shows how the shift to solar energy in particular the use of photovoltaic cells is both economically advantageous and inevitable and will rival the information and communication technologies revolution in its transformative effects In Solar Revolution fund manager and former corporate buyout specialist Travis Bradford argues on the basis of standard business and economic forecasting models that over the next two decades solar energy will increasingly become the best and cheapest choice for most electricity and energy applications Solar Revolution outlines the path by which the transition to solar

technology and sustainable energy practices will occur. Developments in the photovoltaic PV industry over the last ten years have made direct electricity generation from PV cells a cost effective and feasible energy solution despite the common view that PV technology appeals only to a premium niche market. Bradford shows that PV electricity today has become the choice of hundreds of thousands of mainstream homeowners and businesses in many markets worldwide including Japan, Germany and the American Southwest. Solar energy will eventually be the cheapest source of energy in nearly all markets and locations because PV can bypass the aging and fragile electricity grid and deliver its power directly to the end user, fundamentally changing the underlying economics of energy. As the scale of PV production increases and costs continue to decline at historic rates, demand for PV electricity will outpace supply of systems for years to come. Ultimately the shift from fossil fuels to solar energy will take place not because solar energy is better for the environment or energy security or because of future government subsidies or as yet undeveloped technology. The solar revolution is already occurring through decisions made by self interested energy users. The shift to solar energy is inevitable and will be as transformative as the last century's revolutions in information and communication technologies.

Issues and Challenges of Intelligent Systems and Computational Intelligence László T. Kóczy, Claudiu R. Pozna, Janusz Kacprzyk, 2014-01-11. This carefully edited book contains contributions of prominent and active researchers and scholars in the broadly perceived area of intelligent systems. The book is unique both with respect to the width of coverage of tools and techniques and to the variety of problems that could be solved by the tools and techniques presented. The editors have been able to gather a very good collection of relevant and original papers by prominent representatives of many areas relevant both to the theory and practice of intelligent systems: artificial intelligence, computational intelligence, soft computing and the like. The contributions have been divided into 7 parts presenting first more fundamental and theoretical contributions and then applications in relevant areas.

Przedsiębiorstwa biogazowe w rozwoju lokalnym w świetle koncepcji zakorzenienia JUSTYNA

CHODKOWSKA-MISZCZUK, 2019. Powstawanie nowych przedsiębiorstw energetycznych na obszarach wiejskich z jednej strony stanowi wyzwanie, z drugiej zaś stwarza szansę rozwoju. Przejście od scentralizowanej energetyki konwencjonalnej w kierunku zdecentralizowanej energetyki odnawialnej wykorzystującej zasoby lokalne to proces wieloaspektowy, dotyczący nie tylko zmian technologicznych, ale wymagający przede wszystkim przeobrażeń społecznych i przestrzennych. Przekształcenia w sektorze energetycznym kreślą te perspektywy indukowania nowych bodźców w rozwoju społeczno-gospodarczego danego obszaru i mobilizacji potencjału lokalnego. Działając w lokalnych układach budując się powoli, zakorzeniając się, przedsiębiorstwa energetyczne stwarzają możliwości uruchomienia się napływów lokalnych gospodarek. Tworzone relacje i pogłębiana współpraca to także doskonała platforma popularyzowania działań edukacyjnych w zakresie postaw i zachowań charakterystycznych dla społeczeństwa niskoemisyjnego.
