**World 2.0** Shuichi Fukuda,2020-08-18 This book explores on how the Internet of Things IoT will change society by bringing living and non living things together The IoT is currently attracting considerable attention but most of the discussions focus on engineering aspects alone The IoT however is not an extension of traditional engineering where humans and machines are separated Instead it connects humans and machines enabling them to work together as a team the IoT Connected Society In traditional engineering our knowledge and experience of physical and non living things plays a key role but such knowledge and experience alone are not enough We need to introduce life science approaches and integrate them into physical science to really develop the IoT connected society In addition the Internet is not only a tool for delivering messages it is a broader communication tool In the IoT connected society living things and non living things communicate in complex ways Machines 1 Introduction 2 Emerging Industrial Revolution 3 IoT What makes it different from the past revolutions 4 World is changing 5 Engineering How It was developed so far 6 Humans Their characteristics 7 Value is changing 8 Adaptive team organization and management 9 Integration of Physical Science and Life Science 10 Summary can provide humans with a improved situational awareness and advice and together they can communicate to develop a better

happier society Thus this book makes the case that to make the IoT connected society a reality we need to integrate the physical and life sciences and develop a new science for the next generation of engineering
