RISK, PERCEPTION, & POLICY

*"This important book reveals why the young start smoking and why, as adults, they regret having started. It is a great contribution to helping end a national epidemic."*

## **Smoking Risk Perception And Policy:**

**Smoking** Paul Slovic, 2001-05-23 This book presents a counter view based on a survey of several thousand young persons and adults probing attitudes beliefs feelings and perceptions of risk associated with smoking The authors agree that young smokers give little or no thought to health risks or the problems of addiction The survey data contradicts the model of informed rational choice and underscores the need for aggressive policies to counter tobacco firms marketing and promotional efforts and to restrict youth access to tobacco *The Smoking Puzzle* Frank A. Sloan, Vincent Kerry

Smith, Donald H. Taylor, 2003 The authors find that smokers tend to be overly optimistic about longevity and future health if they quit later in life Smokers over 50 revise their perceptions only after a major health shock If smokers are informed of long term consequences and are told that quitting can come too late they are able to evaluate the risks more accurately

**Smoking** W. Kip Viscusi, 1992 Are the risks of smoking exaggerated Has there been an open and rational discussion about the risks of smoking This book attempts to answer these and many other questions about the subject providing a detailed empirical presentation on smoking behavior as a risky consumer decision Using new empirical data based on several national and regional surveys Viscusi addresses a number of important issues including the sources of information that people have about the risks of smoking the accuracy of their perceptions of the risks associated with smoking and the consistency of smoking decisions with other risky behavior scrutinizing issues such as whether smokers value risk differently than those who wear safety belts Viscusi also looks at the differences in age groups and how they assess these risks based on public information He provides new insight into the degree to which individuals understand smoking risks and take these risks into account in their behavior With its detailed empirical data and its examination of individual decision making processes this work will interest researchers in public health public policy psychology and economics as well as anyone concerned with this important issue

**New Perspectives on Risk Communication** Asa Boholm, 2013-12-16 That risk communication ranks high on the policymaking agenda is beyond discussion today The field is a point of intersection of social communication practical management and policy making It covers such diverse activities as to inform and educate the public about risk and risk management in order to influence attitudes and behaviour to act in situations of emergency or crises to aid in decision making and to assist in conflict resolution Communication has grown into a major concern in current risk governance based on network co ordinated management of public affairs conducted by authorities and companies and is recognized as a key component in the government of risk This is especially salient in policy fields relating to environmental planning and resource management urban planning chemical and food regulation or infrastructure planning development and maintenance This book explores risk communication research with a focus on new theoretical perspectives research findings and applied goals It reflects on a broad range of innovative theoretical perspectives methodological approaches and empirical areas This book was published as a special issue of the Journal of Risk Research

**Consumer Perception of**

**Product Risks and Benefits** Gerard Emilien, Rolf Weitkunat, Frank Lüdicke, 2017-03-14 This book reflects the current thinking and research on how consumers perception of product risks and benefits affects their behavior It provides the scientific regulatory and industrial research community with a conceptual and methodological reference point for studies on consumer behavior and marketing The contributions address various aspects of consumer psychology and behavior risk perception and communication marketing research strategies as well as consumer product regulation The book is divided into 4 parts Product risks Perception of product risks and benefits Consumer behavior Regulation and responsibility The Feeling of Risk Paul Slovic, 2013-03-07 The Feeling of Risk brings together the work of Paul Slovic one of the world s leading analysts of risk to describe the extension of risk perception research into the first decade of this new century In this collection of important works Paul Slovic explores the conception of risk as feelings and examines the interaction of feeling and cognition in the perception of risk He also examines the elements of knowledge cognitive skill and communication necessary for good decisions in the face of risk The first section of the book looks at the difficulty of understanding risk without an emotional component for example that disaster statistics lack emotion and thus fail to convey the true meaning of disasters and fail to motivate proper action to prevent them The book also highlights other important perspectives on risk arising from cultural worldviews and concerns about specific hazards pertaining to blood transfusion biotechnology prescription drugs smoking terrorism and nanotechnology Following on from The Perception of Risk 2000 this book presents some of the most significant research on risk perception in recent years providing essential lessons for all those involved in risk perception and communication

**Clinical Textbook of Addictive Disorders** Richard J. Frances, Sheldon I. Miller, Avram H. Mack, 2011-01-01 This authoritative work comprehensively examines all aspects of addictive disorders and their treatment Leading researchers and practitioners identify best practices in assessment and diagnosis and provide tools for working with users of specific substances Issues in working with particular populations including polysubstance abusers culturally diverse patients women and older adults are addressed and widely used psychosocial and pharmacological treatment approaches are reviewed An indispensable text for anyone studying or treating these prevalent challenging disorders the book describes ways to tailor interventions to each patient s needs while delivering compassionate evidence based care

**The Psychology of Risk** Glynis M. Breakwell, 2014-09-15 Since the first edition of The Psychology of Risk there have been enormous macro economic and socio political changes globally the chaos in the world banking system and the financial crisis and recessions that it presaged the Arab Spring and the revolutionary shifts in power in the Middle East with rippled consequences around the world the development of ever more sophisticated cyber terrorism that can strike the private individual or the nation state with equal ease Amidst these changes in the face of hazard do the psychological models built to explain human reactions to risk still apply Has the research over the last few years resulted in an improvement in our understanding of how people perceive and act in relation to risk In this second edition Professor Dame Breakwell uses

illustrations and current examples to address these questions and provide a totally up to the minute review of what is known about the psychology of risk

**Clinical Textbook of Addictive Disorders, Third Edition** Richard J. Frances, Sheldon I. Miller, Avram H. Mack, 2005-05-18 This authoritative work comprehensively examines all aspects of addictive disorders and their treatment Leading researchers and practitioners identify best practices in assessment and diagnosis and provide tools for working with users of specific substances Issues in working with particular populations including polysubstance abusers culturally diverse patients women and older adults are addressed and widely used psychosocial and pharmacological treatment approaches are reviewed An indispensable text for anyone studying or treating these prevalent challenging disorders the book describes ways to tailor interventions to each patient's needs while delivering compassionate evidence based care

But even though it is the best case it often fails It overvalues health and undervalues autonomy It exaggerates the influence of addiction and the marketing of unhealthy products Except for smoking we do not have the evidence needed to show that unhealthy choices are so mistaken as to justify the interventions Much of what modern public health does when it tries to stop adults damaging their health has not been justified The Ethics of Public Health Paternalism applies political and moral philosophy to the ideas of both supporters and critics of public health interventions It uses philosophical analysis of the values of health and well being to explain what sort of evidence is needed to support public health interventions thus exposing a major gap in the arguments of public health advocates and it engages in detail with empirical evidence for instance about smokers regrets The Accuracy of the FTC Tar and Nicotine Cigarette Rating System United States. Congress. Senate. Pampel,2009 Praise for the previous edition Golden Holocaust Robert N. Proctor,2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In Golden Holocaust Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes Social and Behavioral Foundations of Public Health Jeannine Coreil,2010 This book is intended as a core textbook for courses in public health that examines current issues in health from a social and behavioral science perspective It is a cross disciplinary course

public health medical sociology health psychology medical anthropology and thus there are many ways to teach the course based on a particular instructor's perspective. The authors wrote the book because they were dissatisfied with the way other texts apply social science to public health and found that many texts being used were from related fields such as medicine nursing or general health. The authors are planning to do a major revision based on reviews they have collected and the reviews we have collected. We believe the revised edition will essentially be a new text based on rich feedback. They will include new theory, new cases, new research, and a rich ancillary package. They will also reduce the frameworks presented to make the book more readable to students.

*The SAGE Handbook of Social Marketing* Gerard Hastings, Kathryn Angus, Carol Bryant, 2011-11-15. For the first time, this benchmark handbook brings together a systematic framework and state of the art thinking to provide complete coverage of the social marketing discipline. It presents a major retrospective and prospective overview of social marketing, helping to define and shape its current and future developments by examining the defining elements of social marketing: their intellectual origins, evolution, current status, and direction of travel, discussing how these have been used in practice, emphasising emerging areas and recent innovations, and setting the agenda for future research and development in the discipline. For academics, this book will fill the gap in comprehensive social marketing literature, while being of interest to policymakers and postgraduate marketing and health studies students alike, as it explores the idea that tools used to market fast-moving consumer goods and financial services can also be applied to pressing social problems.

**The Business of Sustainability** Scott G. McNall, James C. Hershauer, George Basile, 2011-10-20. This three-volume set is a landmark comprehensive overview of the business of sustainability, providing 56 separate chapters from leaders in business, non-profit organizations, and from within the academic and policy world. In today's business environment, garbage isn't simply worthless; refuse to be disposed of anymore, it often represents a material with monetary value. The human population is using up about 30 percent more natural resources in one year than the earth can regenerate. Because businesses constitute half of the world's largest economies, there can be no sustainability without sustainable businesses. *The Business of Sustainability: Trends, Policies, Practices, and Stories of Success* is a foundation set that effectively captures and articulates the why, what, who, and how of sustainability and business. Volume I covers the scientific, economic, and social underpinnings of sustainability and identifies the challenges facing business leaders. Volume II explores the global network of designers, producers, suppliers, distributors, and consumers that must be addressed as a unit from a cradle-to-cradle life cycle perspective. Volume III presents examples of success across many industries, demonstrating that sustainability is indeed possible. Each volume analytically addresses the larger issues, such as the challenges of managing a business to the standards of sustainability, measuring progress or success, and creating and maintaining sustainable businesses. This monumental work provides a comprehensive treatment of sustainability in the world of businesses, exploring all of its dimensions, obstacles, metrics, opportunities, and pathways to success.

**Behavioral Economics and Its Applications** Peter Diamond, Hannu

Vartiainen, 2012-01-12 In the last decade behavioral economics borrowing from psychology and sociology to explain decisions inconsistent with traditional economics has revolutionized the way economists view the world But despite this general success behavioral thinking has fundamentally transformed only one field of applied economics finance Peter Diamond and Hannu Vartiainen's Behavioral Economics and Its Applications argues that behavioral economics can have a similar impact in other fields of economics In this volume some of the world's leading thinkers in behavioral economics and general economic theory make the case for a much greater use of behavioral ideas in six fields where these ideas have already proved useful but have not yet been fully incorporated public economics development law and economics health wage determination and organizational economics The result is an attempt to set the agenda of an important development in economics an agenda that will interest policymakers sociologists and psychologists as well as economists Contributors include Ian Ayres B Douglas Bernheim Truman F Bewley Colin F Camerer Anne Case Michael D Cohen Peter Diamond Christoph Engel Richard G Frank Jacob Glazer Seppo Honkapohja Christine Jolls Botond Koszegi Ulrike Malmendier Sendhil Mullainathan Antonio Rangel Emmanuel Saez Eldar Shafir Sir Nicholas Stern Jean Tirole Hannu Vartiainen and Timothy D Wilson
