Freemantle tells the stories of these and many other chemists and explains how their work underpinned and shaped what became known as The Chemists War He reveals how chemistry contributed to the care of the sick and wounded and to the health and safety of troops how coal not only powered the war but was also an important source of the chemicals needed for the manufacture of explosives dyes medicines and antiseptics how Britain s production of propellants relied on the slaughter of tens of thousands of whales how a precious metal played a critical role in the war how poisonous chemicals were used as weapons of mass destruction for the first time in the history of warfare and how chemists developed gas masks for protection against these weapons how the British naval blockade of Germany imperilled agricultural production in the United States The book will appeal to the general reader as well as the many scientists and historians interested in the Great War Frontline and Experimental Flying With the Fleet Air Arm Geoffrey Higgs,2020-01-24 The first Royal Navy pilot to fly transatlantic non stop in a Buccaneer describes his thirty five year career in the Fleet Air Arm and as an Empire Test Pilot The spectacle of Alan Cobham s Flying Circus and the Fleet at anchor in Weymouth inspired the author s lifelong passion for aeroplanes flying and the Royal Navy World War Two provided the opportunity to fulfil his ambition and at eighteen he volunteered for the Fleet Air Arm as a pilot Training in Canada began a Naval flying career that spanned thirty years Front line squadron service embarked on aircraft carriers was followed by qualification as a flying instructor Selection for the Empire Test Pilots School at Farnborough and qualification as an experimental Test Pilot changed the direction of his naval career In all he flew nearly one hundred types of aircraft and carried out close to a thousand deck landings Initial flight testing of several new naval aircraft as well as research flying in support of the development of aircraft such as the English Electric Lightning and Concorde added to a unique career Such a long and varied period of flying was not without the inevitable mishaps A near catastrophic catapult launch of a new naval aircraft the jamming of the power control system in a research aircraft and hazardous flying through tropical storms at supersonic speeds to determine safety factors for Concorde s intended Far East route were some of the dangers of flying at the cutting edge As pilot he flew the first Royal Naval aircraft to cross the Atlantic non stop without in flight refuelling or navigational aids He describes the fascinating ten day flight from Croydon to Rangoon across Europe the Middle East Pakistan and India to deliver a Percival Provost trainer to the Burmese Air Force Praise for Frontline and Experimental Flying with the Fleet Air Arm Follow Higgs from one cockpit conference room country to another You ll be as surprised as he is that he lived to tell about some of these adventures Speedreaders This hefty book chronicles a life crammed with flying all types of aircraft mostly shipboard and the inevitable mishaps A good read particularly for those of us who soak up anything to do with ships and aircraft The shipboard accounts of catapult trials amongst other sections are gripping and the times in Singapore and the Far East add to the appeal as do the various accounts of life alongside the Americans Geoffrey Higgs flew nearly 100 different types of aircraft in his career and his love of flying shines through the pages Alan Rawlinson **Flying for Freedom** Alois Siska,2008-10-30 Alois Siska was born in

Czechoslovakia and learnt to fly He escaped to the UK after the German invasion and joined the R A F He describes his experiences flying Wellington bombers In December 1943 he was shot down and he and surviving members of the crew were adrift in the North Sea for 7 days in appalling conditions Picked up by the Germans he underwent surgery to his badly wounded legs and became a POW He suffered at the hands of the Gestapo and was held in numerous camps including Colditz His injuries were so extensive that he was put under the care of Archibald McIndoe Siska chose to return to his native country to join their air force but fell foul of the Communist authorities His persecution is described in the closing chapters His rank was restored only in 1991 on the collapse of the Communist regime Despite his injuries he remained active until 2003 when he died just short of his 90th birthday He was as an active member of the Czech Ex R A F Association the R A F Benevolent Fund in his country and the Sue Ryder Homes for which he raised considerable funds His death was marked with a fly past of the Czech Air Force and he was posthumously awarded the highest military decoration The Order of the White Lion

**Rays of the Rising Sun** John Berger, Philip Jowett, 2013-01-19 The first of a three volume series examining the history of Chinese puppet soldiers fighting for the Japanese before and during World War II When the Japanese Empire went to war with the Allies in December 1941 it had already been fighting in China for 10 years During that time it had conquered huge areas of China and subjugated millions of people The Japanese needed to control the Chinese population in these occupied territories and for this reason they set up governments from amongst the leaders of the Chinese who were willing to co operate with them These so called puppet governments were designed to rule on behalf of the Japanese while firmly under their control In turn the puppet governments needed their own armed forces to help them maintain control over the populace and so they raised their own independent armed forces These puppet armies were in large number reaching a total of well over 1 million before 1945 Although poorly armed and equipped these forces had an influence on the Japanese war effort through sheer numbers The Chinese puppet soldiers ranged from the well drilled and trained regular Army of the Last Emperor of China Pu Yi who ruled the newly formed state of Manchukuo 1932 45 to the irregular Mongol cavalry who served alongside Japanese troops in the secret war waged in the Mongolian hinterlands The troops were dismissed as traitors by the Chinese fighting the Japanese and they were equally despised by the Japanese themselves The troops were motivated by a range of reasons from simple survival to a loyalty to their commander The fact that so many Chinese were willing to fight for the Japanese was embarrassing to all sides and for this reason has been largely ignored in previous histories of the war in the East In the first of a three volume series Philip Jowett tells the story of the Chinese who fought for the Japanese over a fourteen year period
