**I Activate You To Affect Me** Carlos Cornejo, Giuseppina Marsico, Jaan Valsiner, 2018-01-01 The second volume of *Annals of Cultural Psychology* is dedicated to the affective nature of human social relationships with the environment. The chapters here included explore the historical, theoretical and practical dimensions of the concept of affectivating originally introduced by one of us, Valsiner, 1999, as a potential tool of inquiry into the affective sensitive dimension of psychological life within a cultural psychological framework. The concept of affectivating involves two psychological dimensions often undervalued or even obliterated from contemporary cultural psychology: namely, the affective involvement and the agentivity of people in their social encounters. Through several examples (feeling at home, silence, spaces and rituals, memorials, music and poetry, among others), we show individuals' concrete actions in mundane everyday life aim to give an affective personal sense to the world around. This focuses on the primary affective nature of human meaning construction that guides the person in one's continuing feeling into the world. At a theoretical level, the notion of affectivation challenges contemporary Cultural Psychology to rescue subjectivity, not only symbolism. Affectivation propounds a return to the long but partially forgotten organismic tradition represented in the history by thinkers like Wilhelm Dilthey, Jakob von Uexküll and Kurt Goldstein. Cultural psychology has to bring semiosis back to the vital background of human experience      **Success in School** Susan Andres, Felicity Pine, 2012-03-13 In nine cohesive chapters, *Success in School* covers the essential skills and strategies that are prerequisites to student success: how to promote a positive attitude, how to organize a work space, how to manage time, how to heighten reading comprehension, how to take notes, how to study for exams, how to approach and complete writing.
