cultures this comprehensive text introduces students to some of the many indigenous peoples in North America The book is organized into parts corresponding to regional divisions within which similar though not identical cultural practices developed Each part opens with an overview of the topography climate and natural resources in the area and describes the range of cultural practices and beliefs grounded in the area Subsequent chapters are devoted to specific tribal groups their history and the conditions of contemporary Native communities Nancy Bonvillain provides context for the regional and tribe specific chapters through a brief overview of Native American history beginning around 1500 and covering the early period of European exploration and colonization She details both U S and Canadian policies affecting the lives cultures and survival of more than five hundred Native nations on this continent Finally she offers up to date demographics and addresses significant social economic and political issues concerning Native communities The second edition features new material throughout including a new two chapter section on the Native nations of the Plateau expanded introductory material addressing topics such as climate change and recent Supreme Court decisions up to date demographic and economic data Incest Avoidance and the Incest Taboos Arthur P. Wolf, 2014-04-16 Why do most people never have sex with close relatives And why do they disapprove of other people doing so Incest Avoidance and Incest Taboos investigates our human inclination to avoid incest and the powerful taboo against incest found in all societies Both subjects stir strong feelings and vigorous arguments within and beyond academic circles With great clarity Wolf lays out the modern assumptions about both concluding that all previous approaches lack precision and balance on insecure evidence Researchers he calls constitutionalists explain human incest avoidance by biologically based natural aversion but fail to explain incest taboos as cultural universals By contrast conventionalists ignore the evolutionary roots of avoidance and assume that incest avoidant behavior is guided solely by cultural taboos Both theories are incomplete Wolf tests his own theory with three natural experiments bint amm cousin marriage in Morocco the rarity of marriage within Israeli kibbutz peer groups and minor marriages in which baby girls were raised by their future mother in law to marry an adoptive brother in China and Taiwan These cross cultural comparisons complete his original and intellectually rich theory of incest one that marries biology and culture by accounting for both avoidance and taboo
