Pallister, 1839 **Theorizing Anti-Racism** Abigail Bakan, Enakshi Dua, 2014-11-21 p Over the last few decades critical theory which examines issues of race and racism has flourished However most of this work falls on one side or the other of a theoretical divide between theory inspired by Marxist approaches to race and racism and that inspired by postcolonial and critical race theory Driven by the need to move beyond the divide the contributors to Theorizing Anti Racism present insightful essays that engage these two intellectual traditions with a focus on clarification and points of convergence The essays in Theorizing Anti Racism examine topics which range from reconsiderations of anti racism in the work of Marx and Foucault to examinations of the relationships among race class and the state that integrate both Marxist and critical race theory Drawing on the most constructive elements of Marxism and postcolonial and critical race theory this collection constitutes an important contribution to the advancement of anti racist theory *The Diversity of Hunter Gatherer Pasts* Bill Finlayson, Graeme Warren, 2017-06-30 This thought provoking collection of new research papers explores the extent of variation amongst hunting and gathering peoples past and present and the considerable analytical challenges presented by this diversity This problem is especially important in archaeology where increasing empirical evidence illustrates ways of life that are not easily encompassed within the range of variation recognized in the contemporary world of surviving hunter gatherers Put simply how do past hunter gatherers fit into our understandings of hunter gatherers Furthermore given the inevitable archaeological reliance on analogy it is important to ask whether conceptions of hunter gatherers based on contemporary societies restrict our comprehension of past diversity and of how this changes over the long term Discussion of hunter gatherers shows them to be varied and flexible but modeling of contemporary hunter gatherers has not only reduced them into essential categories but has also portrayed them as static and without history It is often said that the study of hunter gatherers can provide insight into past forms of social organization and behavior unfortunately too often it has limited our understandings of these societies In contrast contributors here explore past hunter gather diversity over time and space to provide critical perspectives on general models of hunter gatherers and attempt to provide new perspectives on hunter gatherer societies from the greater diversity present in the past *The Concise Corsini Encyclopedia of Psychology and*

Value Theory Deshun Li, 2013-07-12 Humankind's progress has always been driven by two momentums the pursuit of truth and the creation of value But our understanding of value and our ability to reflect on its complexity has long lagged behind our constant search for truth This has in turn limited our grasp of the essence of truth This book takes philosophical contemplations on value to a new level while also explicating some contemporary Chinese styles of philosophical thought Over the past 25 years this book has been having an increasing impact on Chinese readers and researchers and it also provides a good platform for international dialogue on several key issues of philosophical studies

You and the New Normal Dr Mohamed Buheji, Futurist Chet W. Sisk, 2020-05-29 There are certain points in the history of humanity when everything changes and a new version of what we do who we are how we relate to each other and how we live emerges These moments are usually triggered by a significant event that rocks the earth's very foundation We are living in one of those moments right now It's called a new normal where old ideas that ruled the day are being replaced by new ones that are more efficient more effective and more appropriate for the time But the start of a new normal is not a static moment When things change there is a state of flux where the new normal is still seeking to be established This book provides clarity as to the challenges and the potential of this moment This paradigm shift is a rare event so it is important for us to know what's happening and how we

can thrive and succeed in this time Using foresight intuitive knowledge collective data and indigenous wisdom we have provided a blueprint on what s possible and the tools we ll need to leverage the gifts of this time *The Palgrave International Handbook of Marxism and Education* Richard Hall,Inny Accioly,Krystian Szadkowski,2023-11-07 The Palgrave International Handbook of Marxism and Education is an international and interdisciplinary volume which provides a thorough and precise engagement with emergent developments in Marxist theory in both the global South and North Drawing on the work of authoritative scholars and practitioners the handbook explicitly shows how these developments enable a rich historical and material understanding of the full range of education sectors and contexts The handbook proceeds in a spirit of openness and dialogue within and between various conceptions and traditions of Marxism and brings those conceptions into dialogue with their critics and other anti capitalist traditions As such it contributes to the development of Marxist analyses that push beyond established limits by engaging with fresh perspectives and views that disrupt established perspectives

The Origin of Humanness in the Biology of Love Humberto Maturana Romesín, Gerda Verden-Zöller,2012-02-21 The central concern of this book is us human beings The authors basic question is How is it that we can live in mutual care have ethical concerns and at the same time deny all that through the rational justification of aggression The authors answer this basic question indirectly by providing a look into the fundamentals of our biological constitution concentrating on what they term emotioning that is the flow of emotions in daily life that guides the flow of the systemic conservation of a manner of living Maturana and Verden Zöller claim that the fundamental emotion that gave rise to humans as sapient languaging beings was love and that this remains our fundament even when other emotions become socially prevalent

What IS Sex? Alenka Zupancic,2017-09-08 Why sexuality is at the point of a short circuit between ontology and epistemology Consider sublimation conventionally understood as a substitute satisfaction for missing sexual satisfaction But what if as Lacan claims we can get exactly the same satisfaction that we get from sex from talking or writing painting praying or other activities The point is not to explain the satisfaction from talking by pointing to its sexual origin but that the satisfaction from talking is itself sexual The satisfaction from talking contains a key to sexual satisfaction and not the other way around even a key to sexuality itself and its inherent contradictions The Lacanian perspective would make the answer to the simple seeming question What is sex rather more complex In this volume in the Short Circuits series Alenka Zupan i approaches the question from just this perspective considering sexuality a properly philosophical problem for psychoanalysis and by psychoanalysis she means that of Freud and Lacan not that of the kind of clinician practitioners called by Lacan orthopedists of the unconscious Zupan i argues that sexuality is at the point of a short circuit between ontology and epistemology Sexuality and knowledge are structured around a fundamental negativity which unites them at the point of the unconscious The unconscious as linked to sexuality is the concept of an inherent link between being and knowledge in their very negativity
