**Executive Functions and the Frontal Lobes** Vicki Anderson, Rani Jacobs, Peter J. Anderson, 2010-10-18. This volume has as its primary aim the examination of issues concerning executive function and frontal lobe development. While many texts have addressed these issues, this is the first to do so within a specifically developmental framework. This area of cognitive function has received increasing attention over the past decade and it is now established that the frontal lobes and associated executive functions are critical for efficient functioning in daily life. It is also clear and of particular relevance to this text that these functions develop gradually through childhood and then deteriorate during old age. These developmental trajectories and the impact of any interruption to them are the focus of this volume.

Handbook of Neuroscience for the Behavioral Sciences, Volume II, provides psychologists and other behavioral scientists with a solid foundation in the increasingly critical field of neuroscience. Human Nature Greg Clydesdale, 2016-05-13. Humans are weird. They can be emotional, irrational, and often unpredictable. Yet as their manager, it is your job to get the best out of them. In fact, they are often the key to your success. Sadly, humans do not come with an instruction manual which lists their technical specifications. Human Nature by Greg Clydesdale is based on the premise that the key to good management is understanding human nature and interpersonal relations. But what is human nature? Greg argues that even where human nature is addressed at a conceptual level, the link between theory and what actually happens in the workplace is usually weak and often fails to recognize that social ability is probably the defining aspect. It is his intense focus on human nature and the link between a theoretical understanding of it and what actually happens in the workplace that makes this book so valuable. Throughout the book, you see how managers must constantly make balancing acts between conflicting forces that exist at any given time. But the essential message is: If you want to make the World a better place, focus on being a better manager to your staff. To help with this, you will find an elaboration theory.

based approach in which a basic model is provided and then elaborated on with examples from the work place The model consists of twenty human characteristics placed in three categories emotion motivation and cognition These characteristics are then linked to what managers have to do in the workplace
