The Feathers of Condor Fernando López,2016-08-17 On 25 November 1975 representatives of five South American intelligence services held a secret meeting in the city of Santiago Chile At the end of the gathering the participating delegations agreed to launch Operation Condor under the pretext of coordinating counterinsurgency activities sharing information to combat leftist guerrillas and stopping an alleged advance of Marxism in the region Condor however went much further than mere exchanges of information between neighbours It was a plan to transnationalize state terrorism beyond South America This book identifies the reasons why the South American military regimes chose this strategic path at a time when most revolutionary movements in the region were defeated in the process of leaving behind armed struggle and resuming the political path One of Condor s most intriguing features was the level of cooperation achieved by these governments considering the distrust animosity and historical rivalries between these countries armed forces This book explores these differences and goes further than previous lines of inquiry which have focused predominantly on the conflict between Latin American leftist guerrillas and the armed forces to study the contribution made by other actors such as civilian anticommunist figures and organizations and the activities conducted by politically active exiles and their supporters in numerous countries This broader approach confirms that the South American dictatorships launched the Condor Plan to systematically eliminate any kind of opposition especially key figures and groups involved in the denunciation of the regimes human rights violations **British Books in Print** ,1985 Qualitative Psychology: A Practical Guide to Research
