Social Construction and the Logic of Money J. Samuel Barkin, 2012-02-01 While other studies of international leadership have looked at a variety of measures to predict behavior this book demonstrates that the key factor is international finance J Samuel Barkin uses an innovative blend of rationalist and constructivist methodologies approaches to international political economy that normally exist in isolation from one another Barkin argues that the level of a country's involvement in international finance specifically motivates it to lead This is particularly relevant today given the on going discussions on how to respond to local and global financial crises Barkin illustrates his theory with an episodic history of international monetary leadership over the last four centuries Dutch leadership in the seventeenth century British leadership in the nineteenth the failure of leadership in the interwar era and Great Depression and the role of the U S in the construction of an international economic infrastructure since World War II

The Dollar and National Security Paul Viotti, 2014-07-23 Defense establishments and the armed forces they organize train equip and deploy depend upon the security of capital and capital flows mechanisms that have become increasingly globalized Military capabilities are thus closely tied not only to the size of the economic base from which they are drawn but also to the viability of global convertibility and exchange arrangements Although the general public has a stake in these economic matters the interests and interpretive understandings held by policy elites matter most in particular those among the owners or managers of capital who focus on international finance and the international monetary regimes that sustain global commerce and their capital positions In The Dollar and National Security Paul Viotti explores the links between global capital flows these policy elites and national security After establishing the historical link between currency gold and security he continues the monetary security story by examining the instrumental role the dollar has played in American economic and national security over the past seven decades He reveals how perceived individual and collective interests are the key drivers toward building the kind of durable consensus necessary to sustain the external financing of American foreign and national security policy and addresses the future implications for national security as decision makers in the BRICs and other countries position themselves to assume an even larger policy presence in global commercial monetary and security matters

Uncertain Futures Jens Beckert, Richard Bronk, 2018-07-05 Uncertain Futures considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk The organizing question then becomes how economic actors form expectations and make decisions despite the uncertainty they face This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act It draws on groundbreaking research in economic sociology economics anthropology and psychology to present theoretically grounded empirical case studies These demonstrate how grand narratives central bank forward guidance economic forecasts finance models business plans visions of technological futures and new era stories influence behaviour and become instruments of power in markets and societies The market impact of shared calculative devices social narratives and contingent imaginaries underlines the rationale for a new form of narrative economics

Money Makes Us Relatives Jenny Barbara White, 2004 In the rural immigrant community of Istanbul poor women spend up to fifty hours a week producing goods for export yet deny that they actually work Money Makes Us Relatives asks why Turkish society devalues women's work concealing its existence while creating a vast pool of cheap labor for the world market Drawing on two years of ethnographic fieldwork among family producers and pieceworkers and using fascinating case studies throughout Jenny B White shows how women's paid work is viewed in terms of kinship relations of reciprocity and obligation an extension of domestic work for the family which is culturally valued but poorly compensated Whilst offering the benefits of social identity and long term security women's work also reflects global capitalism's ability to capture local cultural norms and to use these to lower production costs and create exploitative conditions This fully revised second edition includes a new introduction and conclusion updated references
