Social Construction Of Lesbianism:

The Social Construction of Lesbianism Celia Kitzinger, 1987 The old model of lesbianism as a pathological affliction has largely given way to a liberal social scientific one which presents it as an alternative lifestyle a way of loving a sexual preference or a source of personal fulfilment This book argues that the shift from pathological to gay affirmative research merely substitutes one depoliticized construction of the lesbian for another The author contends that the liberal social construction instead of furthering the liberation of women represents a new development in the oppression of women in general and lesbians in particular Gay affirmative constructions are fundamentally incompatible with radical feminist theory in which lesbianism is a political statement representing the bonding of women against male supremacy Kitzinger urges researchers to reject the traditional model of science as an objective search for truths or facts but instead to examine their own rhetoric and evaluate their political commitments From publisher's description *Identities in the Lesbian World*

Lesbians, Women & Society E M Ettorre, 2022-09-01. First published in 1980, *Lesbians, Women and Society* presents an analysis of lesbianism as a phenomenon that developed from a personal problem or individual deviance to a social movement with political ambitions. Social lesbianism, an important concept introduced in the text, refers to the emergence of a public expression of lesbianism and is a stage in the process of establishing a lesbian group identity. It thrusts the issue into the public eye and lends vitality to society's awareness. Two groups of social lesbians are visible: those fearful of change who cling to traditional and social views, 'sick but not sorry', and those who wish to challenge such traditional views in favour of a more public approach, 'sorry but we're not sick'. But regardless of their relationships to the dominant sexual ideology, as a group, social lesbians threaten the structure of power in society. This critical analysis thus challenges many people's views of lesbianism and points out to the uninformed observer the complexities which are involved in the contemporary lesbian experience. This book will be of interest to students of sociology, gender studies, feminist theory and sexuality studies.

Lesbian Studies: Setting an Agenda Tamsin Wilton, 2002-09-11. Neither women's studies nor lesbian and gay studies offers an adequate theoretical or political base for lesbian scholarship. *Lesbian Studies: Setting and Agenda* aim to promote lesbian studies as an academic and political approach to both gender and the erotic and to clarify the damaging influence of heterosexism across a range of disciplines. Drawing on feminism and queer theory, Tamsin Wilton argues that lesbian is a theoretical position which must be widely available in order to challenge the dominance of the heterosexual perspective. Engaging with theoretical and political debates, the book moves beyond its role of setting an agenda for lesbian studies into a wider role as resource and catalysts for anyone interested in gender and the erotic.
