

The image is a composite of two desert scenes. The top half shows a vast desert landscape with a range of rugged, brown mountains in the background under a clear sky. In the middle ground, several tall, columnar saguaro cacti are scattered across a dry, scrubby plain. The bottom half of the image is a close-up of a rocky desert floor covered with a dense carpet of wildflowers, primarily blue lupines and orange poppies, growing between large, smooth, grey boulders.

Halvorson, Cecil R. Schwalbe, Charles van Riper, 2023-01-10 The southwestern deserts stretch from southeastern California to west Texas and then south to central Mexico The landscape of this region is known as basin and range topography featuring to sky islands of forest rising from the desert lowlands which creates a uniquely diverse ecology The region is further complicated by an international border where governments have caused difficulties for many animal populations This book puts a spotlight on individual research projects which are specific examples of work being done in the area and when they are all brought together to shed a general light of understanding the biological and cultural resources of this vast region so that those same resources can be managed as effectively and efficiently as possible The intent is to show that collaborative efforts among federal state agency university and private sector researchers working with land managers provides better science and better management than when scientists and land managers work independently
