[Dark Brilliance](#) Paul Strathern,2025-01-07 A sweeping history of The Age of Reason revealing how although it was a time of great progress it was also an era of brutality and intolerance with a very human cost During the 1600s between the end of the Renaissance and the start of the Enlightenment Europe lived through an era known as The Age of Reason This was a revolutionary period that saw great advances in areas such as art science philosophy political theory and economics However all this was accomplished against a background of extreme political turbulence on a continental scale in the form of internal conflicts and international wars Indeed the Age of Reason itself was born at the same time as the Thirty Years War which would devastate central Europe to an extent that would not be experienced again until World War I This period also saw the development of European empires across the world as well as a lucrative new transatlantic commerce that brought transformative riches to Western European society However there was a dark underside to this brilliant wealth it was dependent upon human slavery By exploring all the key events and bringing to life some of the most influential characters of the era including Caravaggio Rembrandt Newton Descartes Spinoza Louis XIV and Charles I acclaimed historian Paul Strathern tells the vivid story of this paradoxical age while also exploring the painful cost of creating the progress and modernity upon which the Western world was built
