Schwenkbeck,2021-11-13 This book provides an in depth history of three US based communal societies that operated in the late 1960s and 1970s Soul City Stelle and Twin Oaks with an emphasis on their financing marketing and entrepreneurship processes These communities reflect the diversity of people who were dissatisfied with the direction in which American society was heading often underpinned by concerns over racism sexism the environment and capitalism and decided to take the radical step of joining a communal society A moral economy approach offers a lens on how these communities were prevented from fully realizing their visions due to the confines of capitalism as embedded in banking practices zoning laws

and systemic racism *Un-Mapping the Global South* Gero Bauer, Nicole Hirschfelder, Fernando Resende, 2024-03-19 This book offers new approaches and insights into the ongoing and topical discussions on the concepts and definitions of the global south. Instead of adding to the debates about how to properly define the global south as such, it aims at emphasising concrete experiences and accounts of post colonial dislocation and disidentification as both a starting point and linchpin for the subsequent exploration. It brings into conversation theories and interrogations of the global south with specific local studies without presenting them as the romanticised other or as non western narratives. As a bold initiation of future conversations on issues that both directly and indirectly affect ideas about the global south, the volume will be of great interest to scholars and researchers of critical theory, literary and cultural studies, and global south studies.

The Economic Civil Rights Movement Michael Ezra, 2013-04-17 Economic inequalities have been perhaps the most enduring problem facing African Americans since the civil rights movement, despite the attention they have received from activists. Although the civil rights movement dealt successfully with injustices like disenfranchisement and segregated public accommodations, economic disparities between blacks and whites remain sharp, and the wealth gap between the two groups has widened in the twenty-first century. *The Economic Civil Rights Movement* is a collection of thirteen original essays that analyze the significance of economic power to the black freedom struggle by exploring how African Americans fought for increased economic autonomy in an attempt to improve the quality of their lives. It covers a wide range of campaigns ranging from the World War II era through the civil rights and black power movements and beyond. The unfinished business of the civil rights movement primarily is economic. This book turns backward toward history to examine the ways African Americans have engaged this continuing challenge.

"Invisible Cities" and the Urban Imagination Benjamin Linder, 2022-11-08 In 1972 Italo Calvino published *Invisible Cities*, a literary book that masterfully combines philosophy and poetry, rigid structure and free play, theoretical insight and glittering prose. The text is an extended meditation on urban life, and it continues to resonate not only among literary scholars but among social scientists, architects, and urban planners as well. To commemorate the 50th anniversary of *Invisible Cities*, this collection of essays serves as both an appreciation and a critical engagement. Drawing from a wide array of disciplinary perspectives and geographical contexts, this volume grapples with the theoretical, pedagogical, and political legacies of Calvino's work. Each chapter approaches *Invisible Cities* not only as a novel but as a work of evocative ethnography, place writing, and urban theory. Fifty years on, what can Calvino's dreamlike text offer to scholars and practitioners interested in actually existing urban life?

Development Richard Vokes, 2017-11-15 At the start of the 21st century the relationship between media and development has never felt more important Following a series of media revolutions throughout the developing world beginning with the advent of cheap transistor radio sets in the late 1960s followed by the rapid expansion of satellite television networks in the 1990s and the more recent explosion of mobile telephony social media and the internet a majority of people living in the Global South now have access to a wide variety of Information and Communications Technologies ICTs and live in media saturated environments Yet how can radio television and mobile phones be most effectively harnessed towards the goals of purposive economic social and political change Should they be seen as primarily a provider of channels through which useful information can be delivered to target populations in the hope that such information will alter those populations existing behaviours Or should they be seen as a tool for facilitating two way communication between development providers and their recipients i e as technologies for improving participatory development Or should new media environments be approached simply as sites in which people living in the developing world can define development on their own terms This timely and original book which is based on a critical reading of the relevant literatures and on the author's own extensive primary research introduces readers to all of these questions and helps them to reach their own informed positions on each It also examines the history of and current debates regarding media representations of development Drawing on case studies from all over the world including hate radio in Rwanda theatre for development in India telenovelas in Latin America mobile banking and money in Africa and GIS and humanitarianism in Haiti it will be of interest to all undergraduate and postgraduate students of media and development international development professionals and simply to anyone with an interest in how media does can or should change the world [The SAGE Encyclopedia of African Cultural Heritage in North America](#)

Mwalimu J. Shujaa, Kenya J. Shujaa, 2015-07-13 The Encyclopedia of African Cultural Heritage in North America provides an accessible ready reference on the retention and continuity of African culture within the United States Our conceptual framework holds first that culture is a form of self knowledge and knowledge about self in the world as transmitted from one person to another Second that African people continuously create their own cultural history as they move through time and space Third that African descended people living outside of Africa are also contributors to and participate in the creation of African cultural history Entries focus on illuminating Africanisms cultural retentions traceable to an African origin and cultural continuities ongoing practices and processes through which African culture continues to be created and formed Thus the focus is more culturally specific and less concerned with the broader transatlantic demographic political and geographic issues that are the focus of similar recent reference works We also focus less on biographies of

individuals and political and economic ties and more on processes and manifestations of African cultural heritage and continuity FEATURES A two volume A to Z work available in a choice of print or electronic formats 350 signed entries each concluding with Cross references and Further Readings 150 figures and photos Front matter consisting of an Introduction and a Reader's Guide organizing entries thematically to more easily guide users to related entries Signed articles concluding with cross references
