Soul Remembers:

The Soul Remembers Carlos Warter, 1992-06-01 A Parable on Spiritual Transformation What is the purpose of human life Who am I What is the reality of this world I find myself in Why do I find myself in the midst of certain troublesome circumstances Who among us has not pondered some of these questions at times On the outermost level this book is a teaching metaphor similar to those used in all sacred traditions But behind the parable is cosmic perspective on essence individuality and relationships There is a view of human purpose soul design and divine direction that leads to a new look at the origin of suffering healing and the evolutionary dimensional shift Through the voices of archetypes of consciousness the book subliminally explores paths to power love beauty strength and mysticism It moves through different dimensions of reality while simultaneously focusing on the mental emotional and physical aspects of life as instruments of expression that can be tuned to a higher purpose The Soul Remembers is the expression of a spiritual journey that has assisted thousands in their own processes of self remembrance encouraging them to live more deeply and become personally responsible for cocreating heaven on earth

When the Soul Remembers Itself Thomas Singer, Jules Cashford, Craig San Roque, 2019-04-24 Do the ancient Greek poets playwrights philosophers and mythologies have anything to say to modern human beings Is their time finished or do their insights have as much relevance to the human condition as they did 2 500 years ago When the Soul Remembers Itself continues the exploration of the connections between ancient and modern psyche with a resounding affirmation of its ongoing relevance Uniquely combining poetry drama and storytelling in a pioneering collection an international selection of contributors each explore a character myth or theme from ancient Greece in the context of its relevance to the modern psyche Each author enters an imaginative dialogue that pieces and bridges together fragments of the past with the present exploring themes such as initiation war love paranoia tragedy and the soul's journey through the vicissitudes of life on earth through characters such as Ajax Persephone Orpheus Electra the Apostle Paul Perpetua and Jocasta Understanding myth is crucial in Jungian analysis and by connecting the modern person with the age old questions of life and death the contributors bring truly archetypal narratives to life and speak to the human condition throughout the ages When the Soul Remembers Itself will be of great interest to academics and students of Jungian and post Jungian studies classics ancient religion archetypal studies and mythology As the contributors conclusions apply to both contemporary theory and clinical practice it will also appeal to Jungian analysts and psychotherapists in practice and training

Bottoming Out the Universe Richard Grossinger, 2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from

consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth s own words and Jane Roberts s and John Friedlander s interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency

philosophy metaphysics logic and epistemology psychology and ethics and include such questions as how the world came into being how God relates to the world the status of matter how we can gain knowledge in what sense humans have freedom of choice what the nature of soul is and how it relates to the body and how we can attain happiness and salvation This revised edition takes into account the recent developments in the area of later ancient philosophy especially in the philosophy of Early Christianity and integrates them in the relevant chapters some of which are now heavily expanded The Philosophy of Early Christianity remains a crucial introduction to the subject for undergraduate and postgraduate students of ancient philosophy and early Christianity across the disciplines of classics history and theology

An Essay Concerning Humane Understanding John Locke, 1694 **Christians Who Counsel** Ray S. Anderson, 2010-11-01 How does one view Christian counseling as a calling What is the role and task of the counselor from a theological perspective How does one strip away the ambiguity that is too often inherent in the words therapy and counseling in a religious setting Ray S Anderson has written this book as a theologian with a keen interest in helping Christian counselors fulfill their task more effectively by enabling them to see that task more clearly Too often even counselors who achieve effective results are beset by what Anderson calls an uneasy conscience the realization that for some reason a little transactional analysis once a week works better than a month of Sundays in curing the souls of troubled parishioners This book seeks to put that uneasiness and ambiguity to rest by helping counselors see their work as a means of grace rooted in a model of personhood that is both theologically and psychologically sound for realizing the full potential of each person Christians Who Counsel has three parts involving building a foundation for Christian counseling exploring the spiritual dynamics in counseling and describing counseling in a distinctly Christian mode Written without either theological or psychological jargon this book is for all Christians who counsel whether pastors lay counselors psychotherapists or family therapists With clarity of vision comes the power of a renewed commitment

thought they had everything under control as construction of his unique aircraft neared completion sixty eight years later But they were wrong Autopsies on his crewmates showed that he had no vocal cords He couldn't speak but then he didn't have to he could read human thoughts From day one he knew what they were thinking He could tell that they were never going to let him go So he planned his escape While they were studying his scientific advances he was putting together a small team to help him bust out of Area 51 With only four humans with whom he could communicate telepathically he inched closer to freedom But escape wasn't the only problem He had to prevent the US Military and the CIA from pursuing him after his escape Even worse they might follow him home in his own designed spacecraft In order to prevent that he would have to steal their almost completed spaceship and bring down the force behind the military and CIA the United States Government Impossible Of course not With help from the Master it was even probable His escape would change the world just like the death of his half brother Jesus Christ over 2000 years ago They would have much to talk about when he got home
