Soul Affirmation: Introduction to the Philosophy of Life, **Rise Up, O Men of God** L. Dean Allen, 2002 L. Dean Allen analyzes both groups' constructions of masculinity and social ethics in relation to the family, the church, and a prominent social issue. Evangelical Christian leaders designed both organizations in response to their alarm at men's absence from evangelical churches and they sought to increase men's participation in churches and to improve society as a whole by their efforts. Each group faced important social changes during its era, such as new economic realities, women's activities, and perceived moral crises. Despite their similarities as groups for evangelical Christian men only

MRFM and PK developed contrasting constructions of masculinity and divergent social ethical calls for action BOOK JACKET

A Church with the Soul of a Nation Phyllis D. Airhart, 2014-01-01 As Canadian as the maple leaf is how one observer summed up the United Church of Canada after its founding in 1925 But was this Canadian made church flawed in its design as critics have charged A Church with the Soul of a Nation explores this question by weaving together the history of the United Church with a provocative analysis of religion and cultural change **Soul in Society** Gary J. Dorrien, 1995 Gary Dorrien's major work addresses the roots of and remedy to the current crisis in American Christian social ethics Focusing on the story of American liberal Protestantism the book examines in fascinating depth the three major movements in this century the Social Gospel Christian Realism and Liberation Theology in a way that also brings African American feminist environmentalist Catholic and other voices into the increasingly multicultural quest Dorrien then carefully assesses the crisis of social Christian thought in a culture that is increasingly secular materialistic and dominated by capitalism He shows how the progressive Christian vision of social and economic democracy can be redeemed in the face of its apparent defeat He argues strongly for a social Christianity faithful to the spiritual reality and kingdom oriented ethic of the way of Christ Dorrien's engaging narrative knowledgeable and fair analysis and thoughtful proposal bring desperately needed clarity and commitment to the Christian social conscience *Social Orders and Social Landscapes* Charles W. Hartley, Laura M. Popova, Adam T. Smith, 2021-02-10 Social Orders and Social Landscapes marks a new direction in research for Eurasian archaeology that focuses on how people lived in their local environment and interacted with their near and distant neighbours rather than on overarching comparisons of archaeological culture complexes Stemming from the 2005 University of Chicago Eurasian Archaeology Conference the papers collected here reflect this new research agenda though the way in which each author addressed the theme of the conference and thus the book was strikingly varied This diversity arises out of the field's intellectual flux driven by the principled engagement of the rich analytical traditions of the Soviet CIS Anglo American and European schools Despite the variability in approaches and subject matter several key themes emerged 1 the reinterpretation culture categories by examining particular aspects of social life 2 the role social memory plays in the production of landscape and place 3 the influence of the built environment on societies and 4 the ways in which economic considerations affect social orders and landscapes The result is a book that helps to re-image Eurasia as a complex landscape fragmented by historically contingent and shifting ecological and social boundaries rather than a bounded mosaic of culture areas or environmental zones Scholarly research on Eurasia was transformed by the collapse of the Soviet Union in 1991 Entire areas and fields of research became accessible to European and American scholars for the first time resulting in the emergence of new centers specializing in primary field investigations throughout the vast politically transformed landmass of Eurasia One such center is the University of Chicago that has recently sponsored two large international conferences on Eurasian archaeology Social Orders and Social Landscapes is the product of the second Chicago conference held in spring

2005 The editors of the volume should be proud of their efforts that have resulted in such a broad ranging and prompt publication The articles encompass a variety of disciplinary perspectives including archaeology history art history palynology and zooarchaeology extend chronologically from Neolithic and Bronze Age times to the formation of national identity in Turkey in the early 20th century and range geographically from Europe to China Several articles reconstruct basic subsistence activities others analyze distinctive settlement types and political and cultural frontiers including the assimilation and emergence of new self defined ethnic groups and the selective adoption of new systems of religious belief What unites this diverse collection is their consistent emphasis on the social construction of reality and the production of social landscapes and memories that altered perceptions of the physical world and mediated the practical activities that here have been convincingly reconstructed from the archaeological record In so doing rigid stereotypes are questioned and novel interpretations persuasively advanced Early Bronze Age pastoralism on the south Russian steppes did not consist exclusively of herding animals nor was it combined as it was later in the Iron Age with the pursuit of agriculture rather D Anthony and D Brown suggest that at least in the Samara river valley the herding of animals occurred along side the intensive gathering of wild nutritionally rich plants The kalas of ancient Chorasmia are not cities nor even proto urban formations but rather are large heavily fortified enclosures meant to repel attacks of armed nomadic cavalry They represent a continuation of a distinct Central Asian settlement pattern that began in the Bronze Age and that formed the center of a landscape divided into contiguous self contained oases The Mongols not only herded livestock but also farmed fished hunted and traded throughout the vast area that they had conquered uniting most of Eurasia into a single economically integrated system New perspectives proliferate throughout this richly detailed and extremely broad ranging collected volume Phil Kohl Professor of Anthropology and the Kathryn W Davis Professor of Slavic Studies at Wellesley College Social Orders and Social Landscapes is a stimulating addition to the still small literature in English making the rich datasets from the archaeology of Eurasia widely accessible to Western scholars The authors of the eighteen chapters analyze data from China to the Mediterranean from the fourth millennium BCE through the fourteenth century CE with the tools of art and architectural history text analysis paleobotany and paleozoology and anthropological theory among others The product of a conference at the University of Chicago this book fulfils the goal of the graduate student organizers to apply interdisciplinary approaches to understanding the archaeology and history of the Eurasian landmass in local terms through a focus on how people lived in their local environments In the decade and a half since the end of the Soviet Union scholarly communication has broadened and the mutual influences have stimulated many new and thought provoking views on the Eurasian past This book is an exemplary product of the new scholarly discourse Karen S Robinson Research Scholar Department of Anthropology Barnard College Columbia University

The Struggle for the Soul of the SBC Walter B. Shurden, 1993 **A Philosophical Look at Social Justice in Saint Augustine's City of God** Maria Alejandra Madi, 2022-01-18 This book promotes a social justice

approach that emphasizes social relations human desires and lifestyles demonstrating that Saint Augustine s thinking is still relevant today when reflecting on ethical choices that allow the permanence of social bonds It also investigates the conceptual underpinnings of social justice in modern and contemporary political philosophy drawing on ideas from Machiavelli Arendt Polanyi and Foucault as well as Western Marxist and Postmodern perspectives to emphasize the significance of Augustine s ethics The complexity of 21st century social and economic problems necessitates a thorough reworking of conceptual political philosophy outlooks in a context of unprecedented political and environmental concerns This book will result in significant progress toward a philosophy of social justice by renewing the relationship between political life and ethical choices oriented to social well being To address social justice we must be able to reinterpret social challenges from new perspectives The dialogue between Saint Augustine and relevant political philosophers allows for a discussion that may lead to the development of new frameworks and answers This book certainly prepares the reader for current real world social justice debates

The Soul of Latin America Howard J. Wiarda, 2003-01-01 To understand Latin America s political culture and to understand why it differs so greatly from that of the United States one must look beyond the political history of the region Howard J Wiarda explains in this comprehensive book A highly respected expert on Latin American politics Wiarda explores a sweeping array of Iberian and Latin American social economic institutional cultural and religious factors from ancient times to the twentieth century He illuminates the distinctive political attitudes and traditions of Latin America as well as the unique and not widely understood features of present day Latin American models of democracy While Ibero American and Western liberal traditions draw from the same classical thinkers they often emphasize different ideas and reach different conclusions Wiarda contends He traces the influences of Rome Islam medieval Christianity the Reconquest and Iberian feudalism and the powerful but largely unacknowledged effects of the Counter Reformation on Iberian and Latin American civilizations The author concludes with a discussion of recent changes in political culture and an assessment of the strength of democracy s hold in the nations of Latin America

Form and Soul Taachal, 2021-07-11 FORM AND SOUL is a philosophical work that announces a great break with the past the reality of which is being felt by all of us who are the esteemed netizens of the emerging digital age civilization Leaving behind the machine age conceptions of ideas societies and civilizations this work tries to realize the ethos of a new civilization where artificial intelligence information technology and quantum mechanics have turned the ideas of human relations and collective existence upside down This new world of cyber campaigns and collective intelligence is on the verge of leaving behind the odds of cultural nationalism and liberal democracy to reach a new ideological platform where mankind can base its material and moral existence This work can be considered as a great forward movement following Francis Fukuyama s *The End of History and the Last Man* and Samuel Huntington s *The Clash of Civilizations and the Remaking of World Order* to interpret the world where relations between various levels of human organizations are determined by a matrix of dynamic social flows Defining this newly

emerging global social matrix is the main theme of this work

The Vegetative Soul Elaine P. Miller, 2012-02-01 The Vegetative Soul demonstrates that one significant resource for the postmodern critique of subjectivity can be found in German Idealism and Romanticism specifically in the philosophy of nature Miller demonstrates that the perception of German Idealism and Romanticism as the culmination of the philosophy of the subject overlooks the nineteenth century critique of subjectivity with reference to the natural world This book's contribution is its articulation of a plant like subjectivity The vision of the human being as plant combats the now familiar conception of the modern subject as atomistic autonomous and characterized primarily by its separability and freedom from nature Reading Kant Goethe Herder Hegel and Nietzsche Miller juxtaposes two strands of nineteenth century German thought comparing the more familiar animal understanding of individuation and subjectivity to an alternative plantlike one that emphasizes interdependence vulnerability and metamorphosis While providing the necessary historical context the book also addresses a question that has been very important for recent feminist theory especially French feminism namely the question of the possible configuration of a feminine subject The idea of the vegetative subject takes the traditional alignment of the feminine with nature and the earth and subverts and transforms it into a positive possibility Although the roots of this alternative conception of subjectivity can be found in Kant's third Critique and its legacy in nineteenth century Naturphilosophie the work of Luce Irigaray brings it to fruition

The Soul of the German Historical School Yuichi Shionoya, 2006-01-20 This volume is a collection of my essays on Gustav von Schmoller 1838 1917 Max Weber 1864 1920 and Joseph Alois Schumpeter 1883 1950 published during the past fifteen years These three intellectual giants are connected with the German Historical School of Economics in different ways In the history of

economics the German Historical School has been described as a heterodox group of economic researchers who flourished in the German speaking world throughout the nineteenth century The definition of a school is always problematic Even if the core of a certain idea were identified in the continuous and discontinuous process of the filiation and ramification of thought it is still possible to trace its predecessors successors and sympathizers in different directions creating an amorphous entity of a school It is beyond question however that Schmoller was the leader of the younger German Historical School the genuine school with a sociological reality Schmoller was indeed the towering figure of the Historical School at its zenith

The Lost Soul of American Protestantism D. G. Hart, 2004-08-27 In *The Lost Soul of American Protestantism* D G Hart examines the historical origins of the idea that faith must be socially useful in order to be valuable Through specific episodes in Presbyterian Lutheran and Reformed history Hart presents a neglected form of Protestantism confessionalism as an alternative to prevailing religious theory He explains that unlike evangelical and mainline Protestants who emphasize faith's role in solving social and personal problems confessional Protestants locate Christianity's significance in the creeds ministry and rituals of the church Although critics have accused confessionalism of encouraging social apathy Hart deftly argues that this form of Protestantism has much to contribute to current discussions on the role of religion in American public life since confessionalism refuses to confuse the well being of the nation with that of the church The history of confessional Protestantism suggests that contrary to the legacy of revivalism faith may be most vital and influential when less directly relevant to everyday problems whether personal or social Clear and engaging D G Hart's groundbreaking study is essential reading for everyone exploring the intersection of religion and daily life

The Vision of the Soul James Matthew Wilson, 2017 Ours is an age full of desires but impoverished in its understanding of where those desires lead an age that claims mastery over the world but also claims to find the world as a whole absurd or unintelligible In *The Vision of the Soul* James Matthew Wilson seeks to conserve the great insights of the western tradition by giving us a new account of them responsive to modern discontents The western or Christian Platonist tradition he argues tells us that man is an intellectual animal born to pursue the good to know the true and to contemplate all things in beauty Wilson begins by reconceiving the intellectual conservatism born of Edmund Burke's jeremiad against the French Revolution as an effort to preserve the West's vision of man and the cosmos as ordered by and to beauty After defining the achievement of that vision and its tradition Wilson offers an extended study of the nature of beauty and the role of the fine arts in shaping a culture but above all in opening the human intellect to the perception of the form of reality Through close studies of Theodor W Adorno and Jacques Maritain he recovers the classical vision of beauty as a revelation of truth and being Finally he revisits the ancient distinction between reason and story telling between mythos and logos in order to rejoin the two Story telling is foundational to the forms of the fine arts but it is no less foundational to human reason Human life in turn constitutes a specific kind of form a story form The ancient conception of human life as a pilgrimage to beauty itself is one that we can fully embrace only if we

see the essential correlation between reason and story and the essential convertibility of truth goodness and beauty in beauty By turns a study in fundamental ontology aesthetics and political philosophy Wilson s book invites its readers to a renewal of the West s intellectual tradition *The Soul's Economy* Jeffrey Sklansky,2003-10-16 Tracing a seismic shift in American social thought Jeffrey Sklansky offers a new synthesis of the intellectual transformation entailed in the rise of industrial capitalism For a century after Independence the dominant American understanding of selfhood and society came from the tradition of political economy which defined freedom and equality in terms of ownership of the means of self employment However the gradual demise of the household economy rendered proprietary independence an increasingly embattled ideal Large landowners and industrialists claimed the right to rule as a privilege of their growing monopoly over productive resources while dispossessed farmers and workers charged that a propertyless populace was incompatible with true liberty and democracy Amid the widening class divide nineteenth century social theorists devised a new science of American society that came to be called social psychology The change Sklansky charts begins among Romantic writers such as Ralph Waldo Emerson and Margaret Fuller continues through the polemics of political economists such as Henry George and William Graham Sumner and culminates with the pioneers of modern American psychology and sociology such as William James and Charles Horton Cooley Together these writers reconceived freedom in terms of psychic self expression instead of economic self interest and they redefined democracy in terms of cultural kinship rather than social compact **Exploring the Life of the Soul** John Hanwell Riker,2017-02-03 In this book John Hanwell Riker develops and expands the conceptual framework of self psychology in order to offer contemporary readers a naturalistic ground for adopting an ethical way of being in the world Riker stresses the need to find a balance between mature narcissism and ethics to address and understand differences among people and to reconceive social justice as based on the development of individual self This book is recommend for readers interested in psychology and philosophy and for those who wonder what it means to be human in the modern age **Forum** Loretta Sutton Metcalf,Walter Hines Page,Joseph Mayer Rice,Frederic Taber Cooper,Arthur Hooley,George Henry Payne,Henry Goddard Leach,D.
