George-Sawyer,2013-09-30 Throughout my life I have been always on the go always looking for the next level Ive never felt settled and comfortable always setting the next goal as soon as the current one nears completion and pushing myself all the time With this attitude I felt myself under pressure most of the time and with pressure comes stress loads of stress and the feeling that I never had enough time I was burning the candle at both ends but I concluded that this was what life required For those of us who want to thrive and lead a healthy lifestyle in this high pressure world of instability confusion constant change and stress we couldnt stand a chance if we were physically or mentally sluggish So when I got to know about flotation therapy I quickly realised that this could be the natural answer to the stresses of this ever changing world of ours Regular floating can be the way to relax your tired body while engaging your subconscious mind as you control your thoughts I discovered that regular floating made me a healthier and happier person I said goodbye to a stressful lifestyle as I exercised and reinforced my bodys capacity for happy thoughts healing good sleep creativity and imagination I had lower blood pressure easier concentration and more energy I discovered how regular floating positively changed my life and helped me focus on the things I want out of life The powerful technique of floating can help people especially go getters to achieve their goals to become much more centred and to tackle the issues and problems that life throws at them easily and calmly Isnt true that if we approach our problems in a relaxed state we stand a better chance of solving them So when I was called up to run one of the very first flotation centres in England I was completely blown away by the difference this form of therapy made in my life The experience of lying in a tank a gravity free environment experiencing weightlessness and proper blood circulation sold me on the idea of floating regularly I thought of the millions of people out there with busy lifestyles like me who could find the results from floating regularly very helpful I thought of people who may be magnesium deficient who may be at risk of developing or already suffer from poor blood circulation diabetes arthritis obesity stroke cancer heart disease fatigue and those who may be so stressed out that they cannot even sleep at night At the flotation centre I started researching flotation and the difference it made in peoples lives My position at the time facilitated this research as I always found the time to chat

with all my clients about their experiences on the day to see what changes regular floating was making for them What I found was that there was not enough information out there about how this fantastic therapy can be beneficial in the long term I was so involved with the floating business that even my spare time was eaten up by research on the topic and I promised myself that as soon as the opportunity arose I would put pen to paper to let the world know in depth the benefits of being present within switching off and being in solitude and seclusion while spending some time in a gravity free sensory deprivation isolation tank for just an hour or a lunchtime holiday
