evidence based explanation *Tilogos* Sherman P. Bastarache,2012-04 Language is so easily learned that children master it in the very early stages of life The expression of self through language is based in innate instincts but it must be learned It can be as simple as adding blocks together to spell words the only difference is that it consists of adding phonemes together These phonemes are derived from grunts and calls and are strung together to form words or Tilogos which are combined into sound click s with definitive meaning In order to understand the evolution of language from calls and cries to modern articulation we must first understand how the most basic of guttural sounds was originally used to represent a species recognizable concept in the earliest stages of interpersonal communication From there we must strive to understand how these basic sounds are manipulated and strung together to create complex words with varying meaning representative of anything from items in one s surroundings to intangible thoughts and emotions At its heart Tilogos explores the question of how human beings have developed the ability to use simple noises to represent the most complex aspects of our shared world
