J. Corfield, 2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio's business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio's flesh Portia cleverly intervenes and all ends well except of course for Shylock **Time for Science Education** Michael Matthews, 2012-12-06 The book's argument depends as do most proposals in education upon certain positions in the philosophy of education I believe that education should be primarily concerned with developing understanding with initiation into worthwhile traditions of intellectual achievement and with developing capacities for clear analytic and critical thought These have been the long accepted goals of liberal education In a liberal education students should come to know and appreciate a variety of disciplines know them at an appropriate depth see the interconnectedness of the disciplines or the modes of thought and finally have some critical disposition toward what is being learned to be genuinely open minded about intellectual things These liberal goals are contrasted with goals such as professional training job preparation promotion of self esteem social engineering entertainment or countless other putative purposes of schooling that are enunciated by politicians administrators and educators The book's argument might be consistent with other views of education especially ones about the training of specialists sometimes called a professional view of education but the argument fits best with a liberal view of education The liberal hope has always been that if education is done well then other personal and social goods will follow The development of informed critical and moral capacities is the cornerstone for personal and social achievements **Manipulating the Sun**, 2023-12-18 This volume puts two biblical miracles the Sun reversing its course in II Kings 20 8 11 Isaiah 38 8 Horologium Ahaz and the Sun standing still in Joshua 10 12 in the early modern period centre stage We pay special attention to the development of related imagery their role as anti Copernican arguments in text and image their reception their treatment in the mathematical sciences and their various cultural layers with a focus on the history of art and the history of science in the sixteenth and seventeenth centuries The material discussed spreads from rather prosaic mathematical reflections to highly appealing visual representations of the two miracles

Education, the Anthropocene, and Deleuze/Guattari David R. Cole, 2021-10-11 Human civilisation stands at an

unimaginable precipice The human past leading up to today has seen society develop under the conditions of the Holocene since 10000 BC However we are now in the Anthropocene what Deleuze Guattari term as the future rupturing the present This book analyses the Anthropocene given four dimensions tool enhancement carbon trail the phalloscene and atomic time A mode of education and social change lies parallel to this mapping that tackles degrowth changing consciousness a Green Utopia and building a critical immanent model to realign current practices in the light of globalisation This is the first book to put the philosophy of Deleuze Guattari to work for the future and our collective existence as a differentiated educational practice in the Anthropocene

The Clock C. S. Wimmer, 2015-06-23 Gods voice whispers through the words of the prophet Isaiah I make known the end from the beginning from ancient times what is still to come Isaiah 46 10 NIV When warning his disciples about heaven and earth passing away Jesus said No one knows about that day or hour not even the angels in heaven nor the Son but only the Father Be on guard Be alert You do not know when that time will come Mark 13 32 33 NIV Are we to believe that God makes known the end from the beginning Or should we believe that the day and the hour are unknowable In truth these seemingly contradictory verses in Scripture are equally believable when time is viewed on two different clocks To date however humankind has relied solely on the 24 hour clock that secured residence within the human mind more than 8 000 years ago Humanitys one clock perspective of time is entirely useless in determining spiritual beginnings and endings Yet a different perspective emerges from the text of Genesis 1 which does in fact make known the end from the beginning The Clock revealed within the pages of this book will help the human spirit develop a healthy theology of time and not a moment too soon Through the lens of light color and image The Clocks colorful face revisits the past identifies the present and makes known the future while orienting the human mind on its journey through time If Jews and Christians desire additional insight into our shared spiritual beginnings we must discover The Clock in Genesis 1 and embrace a two clock perspective of time Once aware of a second timekeeping option the mystery surrounding many end times scenarios will be removed enabling us to travel together with confidence into our projected future Its time to understand the times
