Margaret Schwartz, 2015-12-15 Taking as its starting point the significant role of the photograph in modern mourning
practices particularly those surrounding public figures *Dead Matter* theorizes the connections between the body and the
image by looking at the corpse as a special instance of a body that is simultaneously thing and representation Arguing that
the evolving cultural understanding of photographic realism structures our relationship to the corpse the book outlines a new
politics of representation in which some bodies are more visible and vulnerable in death than others To begin interpreting
the corpse as a representational object referring to the deceased Margaret Schwartz examines the association between
photography and embalming both as aesthetics and as mourning practices She introduces the concept of photographic
indexicality using it as a metric for comprehending the relationship between the body of a dead leader including Abraham
Lincoln Vladimir Lenin and Eva Per n and the body politic for which it stands She considers bodies known as victims of
atrocities like Emmett Till and the Syrian boy Hamsa al Khateeb to better grasp the ways in which the corpse as object may be
called on to signify a marginalized body politic at the expense of the social identity of the deceased And she contemplates
tabloid bodies such as Princess Diana's and Michael Jackson's asserting that these corpses must remain invisible in order to
maintain the deceased as a source of textual and value production Ultimately concluding that the evolving cultural
understanding of photographic realism structures our relationship to the corpse *Dead Matter* outlines the new politics of
representation in which death is exiled in favor of the late capitalist reality of bare life *The gallery of engravings, ed. by*
