There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of *Regional Studies*      *The SAGE Handbook of European Studies* Chris Rumford, 2009-06-18 This volume brings together some of the biggest names in European Studies to analyse the most important trajectories of Europe's development and the challenges faced by the continent today No one interested in Europe will be able to ignore this extraordinary collection of scholarship Professor Thomas Diez University of Birmingham In its range and comprehensiveness it will be hard to beat and it will certainly become an invaluable resource for sociologists political scientists historians and all others seeking the best information and most up to the date approaches to the study of Europe today Professor Krishan Kumar University of Virginia An impressive account of the state of the art of the study of contemporary Europe This is an outstanding work and a definite companion to all those interested in contemporary Europe *Journal of Contemporary European Studies* Europe is one of the world's oldest

**Global City-Regions** Allen J. Scott, 2001-01-25 There are now more than three hundred city regions around the world with populations greater than one million These city regions are expanding vigorously and they present many new and deep challenges to researchers and policy makers in both the more developed and less developed parts of the world The processes of global economic integration and accelerated urban growth make traditional planning and policy strategies in these regions increasingly inadequate while more effective approaches remain largely in various stages of hypothesis and experimentation Global City Regions represents a multifaceted effort to deal with the many different issues raised by these developments It seeks at once to define the question of global city regions and to describe the internal and external dynamics that shape them it proposes a theorization of global city regions based on their economic and political responses to intensifying levels of globalization and it offers a number of policy insights into the severe social problems that confront global city regions as they come face to face with an economically and politically neoliberal world At a moment when globalization is increasingly subject to critical scrutiny in many different quarters this book provides a timely overview of its effects on urban and regional development one of its most important but perhaps least understood corollaries The book also offers a series of nuanced visions of alternative possible futures

**Cultural and Creative Industries and Regional Development** Roberto Dellisanti, 2023-05-16 This book explores the role of the cultural and creative industries CCIs as drivers of local economic development More specifically it builds on two novel perspectives in order to interpret the phenomenon First despite the general recognition that CCIs are innovative economic actors their creative output is heterogeneous as CCIs consist of extremely diverse industries and the concept of innovation differs from sector to sector Second CCIs creativity is locally rooted as the context provides innovative inputs for the development of creative ideas binding creativity with well established theories of the regional innovation literature The book explores these new perspectives through a novel database on CCIs innovation at a fine industrial and regional scale Building on these two ideas the book is subdivided into three parts In the first a novel definition of creativity in CCIs is developed in which its

heterogeneity and place based nature are at the core In turn the second part addresses the phenomenon of localization choices in CCIs highlighting their heterogeneous innovativeness and the fili re which they belong to as key dimensions for the analysis In the third part the impact of CCIs on economic growth is explored This book offers new evidence on the conditions under which CCIs cluster in space and stimulate development It appeals to scholars in regional science cultural economics and related fields as well as policymakers and practitioners working in the cultural and creative industries

Metropolitan Governance and Spatial Planning Anton Kreukels, Willem Salet, Andy Thornley, 2005-08-19 Metropolitan Governance and Spatial Planning explores the relationship between metropolitan decision making and strategies to co ordinate spatial policy This relationship is examined across 20 cities of Europe and the similarities and differences analysed Cities are having to formulate their urban policies in a very complex and turbulent environment They are faced with numerous new pressures and problems and these often create contradictory conditions The book provides a theoretical framework for exploring these issues and links this to a detailed investigation of each city In the context of globalisation cities in the last twenty years have experienced new patterns of activity and these usually transcend political boundaries The management of these changes therefore requires an effort of co ordination and different cities have found different approaches However the institutional setting itself has not remained static The nation states in Europe have handed over many responsibilities to the European Union while also increasing devolution to regions and cities Government has therefore become a more complex multi level activity There has also been the move from government to governance Many different public quasi public and private bodies are now involved in making decisions that affect urban development Metropolitan governance is therefore also a complex multi actor process In these conditions of fragmented governance and the widening spatial networking of urban development the issue of policy co ordination become ever more important The exploration of the 20 cities shows that many face similar difficulties while some also provide interesting examples of innovative practice The book concludes that the way forward is to find strategies to link the different spheres of metropolitan action through organising connectivity
