Originally published in Polish in 2000 as J zyki chi skie this work collected K nstler s various lectures on the fascinating world of this branch of the Sino Tibetan language family It marked the apogee of linguistic research of Chinese languages in Poland With a keen intuitive understanding of the workings of these languages K nstler introduces his readership to the historical development of spoken Sinitic languages Besides analyzing the various stages of Standard Chinese he also makes a convincing case for classifying Cantonese Pekinese Nankinese Minnanese Wu and other so called dialects as distinct languages K nstler s work offers an insightful and detailed overview about synchronic and diachronic research on the major language groups of Chinese a fast growing academic field until today The present English version was begun by K nstler himself before his untimely demise in 2007 However it is not merely a translation of the Polish work but a revised edition that introduces a shift in Sinological linguistics from a genetic to an areal description of Modern Chinese languages A joint effort of the Polish linguist Alfred Franciszek Majewicz and the Sinologists Ewa Zajdler and Maria Kurpaska helped to bring the original manuscript to its completion Thus The Sinitic Languages is now finally accessible for a larger readership Both amateurs and experts interested in this topic are invited to follow K nstler on his intellectual journey into Sinological linguistics K nstler intentionally excluded Chinese characters from his work because he viewed the Sinitic languages primarily as spoken languages In order to provide readers with the opportunity to compare spoken and written language the editors added an index with glossary to the English version **International Organization and Conference Series** United States.
