

A dark, grainy photograph of a destroyed bus, possibly a school bus, with its windows shattered and its structure mangled. In the foreground, three children are visible: a girl on the left, a girl in the center, and a boy on the right. The ground is littered with debris and there are small fires burning in the background. The overall atmosphere is one of tragedy and violence.

Terrorism Ethics And Modern Society:

Terrorism, Ethics, and Modern Society Lawrence George Lux, 2001 Terrorism grows as a problem in the World today at predictable rate due to the rise of Sectarianism This is a function of Population increase signifying organizational structures Political Social and Religious have failed to keep pace with the pressures of Society and growth The withdrawal into Sectarianism reflects attempts of these organizations to continue their function without structural change Terrorism traces the violence used as last resort to maintain organizational tradition This Work examines the process with suggested alterations for elimination of the violence

The Oxford Handbook of the History of Terrorism Carola Dietze, Claudia Verhoeven, 2022 The Oxford Handbook of the History of Terrorism presents a re evaluation of the major narratives in the history of terrorism exploring the emergence and the use of terrorism in world history from antiquity up to the twenty first century The volume presents terrorism as a historically specific form of political violence that was generated by modern Western culture and then transported around the globe where it interacted with and was transformed in accordance with local conditions It offers cogent arguments and well documented case studies that support a reading of terrorism as a modern phenomenon as well as sustained analyses of the challenges involved in the application of the theories and practices of modernity and terrorism to non Western parts of the world both for historical actors and academic commentators

Counter-Terrorism, Ethics and Technology Adam Henschke, Alastair Reed, Scott Robbins, Seumas Miller, 2021-12-14 This open access book brings together a range of contributions that seek to explore the ethical issues arising from the overlap between counter terrorism ethics and technologies Terrorism and our responses pose some of the most significant ethical challenges to states and people At the same time we are becoming increasingly aware of the ethical implications of new and emerging technologies Whether it is the use of remote weapons like drones as part of counter terrorism strategies the application of surveillance technologies to monitor and respond to terrorist activities or counterintelligence agencies use of machine learning to detect suspicious behavior and hacking computers to gain access to encrypted data technologies play a significant role in modern counter terrorism However each of these technologies carries with them a range of ethical issues and challenges How we use these technologies and the policies that govern them have broader impact beyond just the identification and response to terrorist activities As we are seeing with China the need to respond to domestic terrorism is one of the justifications for their rollout of the social credit system Counter terrorism technologies can easily succumb to mission creep where a technology s exceptional application becomes normalized and rolled out to society more generally This collection is not just timely but an important contribution to understand the ethics of counter terrorism and technology and has far wider implications for societies and nations around the world
