Abstract. Numerous countries around the world have made exceptional efforts to combat terrorism. Many of these efforts have been undertaken individually and outside the scope of the United Nations, despite its charter designating it as the authority responsible for addressing issues of international peace and security through the Security Council. Describing these efforts, they represent the endeavors of states directly affected by terrorism. However, this does not imply that the United Nations, as the institution under which the international community operates, has been distant from this highly significant matter. On the contrary, the diplomatic history of the issue of terrorism found its primary arena within the United Nations. Legal discussions began within the framework of UN bodies and agencies. Mechanisms ensuring the international community's response to combating terrorism were appropriately developed within UN agencies. Additionally, the executive mechanisms can be found in the organization's efforts. Moreover, the international legal confrontation of terrorism was fundamentally organized through the United Nations. Reports, resolutions, treaty formulations, and conferences were significantly conducted within the premises of the international organization. The United Nations also served as the primary sponsor of other international conferences closely examining issues directly related to international terrorism, attempting to blend statements and recommendations in a manner consistent with the accepted concept of terrorism, achieving widely acceptable results among all member states. Regarding individual state activities, efforts to combat terrorism legally and materially vary according to the interests of those states and their concept of terrorism, which often does not align with the concept upheld by other countries. Therefore, this study will explore the concept of terrorism in the first section, address the legal obstacles to combating terrorism in the second section, and finally, discuss the international efforts to confront it in the third section.

RESEARCH PROBLEM

A careful examination of international law rules might raise the issue of whether terrorism is considered a distinct subject within international law. The debate persists on whether there is truly an international law specifically addressing terrorism, or if what actually exists is an international law concerning terrorism.

This brings us to the primary issue: whether the study in this context pertains to examining a substantive issue governed by law, or if it is an attempt to explore the applicability of international law rules to a contemporary problem that lacks clear legal organization. Alternatively, it could be a matter of determining whether a collection of fragmented and unrelated legal rules, subject to the varying interpretations of states based on their individual definitions of terrorism, govern the issue.

The OIC, the UN, and Counter-Terrorism Law-Making Katja Samuel,2014-07-18 The increasingly transnational nature of terrorist activities compels the international community to strengthen the legal framework in which counter terrorism activities should occur at every level including that of intergovernmental organizations This unique timely and carefully researched monograph examines one such important yet generally under researched and poorly understood intergovernmental organization the Organization of Islamic Cooperation OIC formerly the Organization of the Islamic Conference In particular it analyses in depth its institutional counter terrorism law making practice and the relationship between resultant OIC law and comparable UN norms in furtherance of UN Global Counter Terrorism Strategy goals Furthermore it explores two common mis assumptions regarding the OIC namely whether its internal institutional weaknesses mean that its law making practice is

inconsequential at the intergovernmental level and whether its self declared Islamic objectives and nature are irrelevant to its institutional practice or are instead reflected within OIC law Where significant normative tensions are discerned between OIC law and UN law the monograph explores not only whether these may be explicable at least in part by the OIC s Islamic nature and objectives but also whether their corresponding institutional legal orders are conflicting or cooperative in nature and the resultant implications of these findings for international counter terrorism law and policy making This monograph is expected to appeal especially to national and intergovernmental counter terrorism practitioners and policy makers as well as to scholars concerned with the interaction between international and Islamic law norms From the Foreword by Professor Ben Saul The University of Sydney Dr Samuels book must be commended as an original and insightful contribution to international legal scholarship on the OIC Islamic law international law and counter terrorism It fills significant gaps in legal knowledge about the vast investment of international and regional effort that has gone into the global counter terrorism enterprise over many decades and which accelerated markedly after 9 11 The scope of the book is ambitious its subject matter is complex and its sources are many and diverse Dr Samuel has deployed an appropriate theoretical and empirical methodology harnessed an intricate knowledge of the field and brought a balanced judgement to bear to bring these issues to life
