*Terrorists, Victims and Society* Andrew Silke, 2003-11-14 In today's climate there is a powerful need for a balanced expert and accessible account of the psychology of terrorists and terrorism. Written by an expert team of psychologists and psychiatrists, these contributors have direct experience of working with terrorists, victims and those tasked with the enormous responsibility of attempting to combat terrorism. The first section focuses on terrorists as individuals and as groups and provides a balanced and objective insight into the psychology of terrorists: what their motivations are and what keeps them involved in terrorist groups. The second section explores the huge question of the impact of terrorism: the direct and indirect effect on victims, how societies respond and how political leaders handle the threat and consequences of terrorism. The final section focuses on the question of how to respond to terrorist threat. The most up-to-date account of our understanding of terrorists, their psychology and the impact they have on the world around them. Written by leading world experts on terrorist psychology. A complete view of terrorism looks at the terrorists themselves, their victims and society as a whole.

*Psychology and Crime* Craig Webber, 2009-12-08 This book explores the links between psychology and crime, evaluating psychological explanations of crime and the use of psychology within the criminal justice system. It provides a comprehensive overview that highlights the consequences of crime for victims, offenders and wider society. The book combines classic theory with new developments in eyewitness testimony, offender profiling and forensic psychology. The resulting text offers an engaging and challenging route to a full understanding of key topics including the theoretical history of criminal psychology, interpersonal violence, sexual violence and deviancy, the psychology of crime in groups, mass murder and war crimes, psychology and the criminal justice system. *Psychology and Crime* genuinely integrates the two areas with the advanced student in mind and includes a range of practical devices to support the learning process: chapter overviews, study questions and further reading. Lively and accessible, it is essential reading for students and academics in criminology, sociology and psychology. The *Key Approaches to Criminology* series celebrates the removal of traditional barriers between disciplines and specifically reflects criminology's interdisciplinary nature and focus. It brings together some of the leading scholars working at the intersections of criminology and related subjects. Each book in the series helps readers to make intellectual connections between criminology and other discourses and to understand the importance of studying crime and criminal justice within the context of broader debates. The series is intended to have appeal across the entire range of undergraduate and postgraduate studies and beyond, comprising books which offer introductions to the fields as well as advancing ideas and knowledge in their subject areas.

**The Psychology of Counter-Terrorism** Andrew Silke, 2010-10-26 This work firstly aims to provide balanced and objective insight into the psychology of terrorists: what their motivations are, what keeps them involved in terrorist groups and what eventually forces most to end their active involvement in terrorism. Secondly, the contributors focus on the challenging issue of how to respond to terrorism. These chapters provide information for those

concerned with short term tactical problems e.g interviewing as well as those looking towards the more long term strategic questions of bringing an entire terrorist campaign to an end Ultimately the individuals involved in terrorism require a more complex response from society than simply a quest for their apprehension Believing inaccurate and misleading characterizations leads inevitably to damaging policies and deficient outcomes with campaigns of violence being needlessly prolonged It is from this perspective that the concern arises with how researchers and the policy makers guided by them perceive the psychology of terrorists and of terrorism
