Photography After Capitalism Ben Burbridge, 2020-12-15 A polemical analysis of the politics and economics of today's vernacular photographic cultures In *Photography After Capitalism* Benedict Burbridge makes the case for a radically expanded conception of photography encompassing the types of labor too often obscured by black boxed technologies slick platform interfaces and the compulsion to display lives to others His lively and polemical analysis of today's vernacular photographic cultures shines new light on the hidden work of smartphone assembly teams digital content moderators Street View car drivers Google Scan Ops low paid gallery interns homeless participant photographers and the photo sharing masses Bringing together cultural criticism social history and political philosophy Burbridge examines how representations of our photographic lives in advertising journalism scholarship and particularly contemporary art shape a sense of what photography is and the social relations that comprise it More precisely he focuses on how different critical and creative strategies from the appropriation of social media imagery to performative traversals of the network from documentaries about secretive manual labor to science fiction fantasies of future sabotage affect our understanding of photography's interactions with political and economic systems Drawing insight and inspiration from recent analyses of digital labour community economies and post capitalism Burbridge harnesses the ubiquity of photography to cognitively map contemporary capitalism in search of its weak spots and levers sites of resistance and opportunities to build better worlds

Fashion Aesthetics and Ethics Louise Wallenberg, Andrea Kollnitz, 2023-05-04 How are aesthetics and ethics related to the practical realities of the global fashion industry Both have played an important role in academic fashion studies to this point but they are most often discussed in the context of abstract phenomena such as modernity and capitalism or identity issues such as sexuality class and gender The essays in this volume strive instead to show how the realities of the global fashion industry have important and pertinent aesthetic and ethical consequences This collection provides critical and philosophical analysis of the interplay of aesthetics and ethics within the global fashion industry Characterized by an increasingly fast spinning production the industry is highly exploitative in terms of environment and labor force underpaid textile workers retailers working under brutal competition from the mass merchandise discounters young designers seamstresses and curators often working for free and a vast body of aspiring models In addition fashion related aesthetic ideals are becoming more influential than ever in directing consumers in their social and personal identification processes and bodily practices with sometimes fatal consequences Covering a wide range of subjects such as fashion's highly problematic production and consumption practices the possibility of producing and consuming fashion ethically fashion's intimate connection with nature and technology *Fashion Aesthetics and Ethics* highlights the powerful aesthetical presence of fashion in relation to its ethical premises and often problematic outcomes
