Values at Sea Dorinda G. Dallmeyer, 2003 The human impact on vast areas of the oceans remains relatively unregulated Sometimes in fact the only controls over our exploitation of marine resources lie in our environmental consciousness While the field of environmental ethics has explored rights and duties for land use stewardship and policy relatively little attention has been given to comparable issues of marine environments Values at Sea makes an important step toward moving environmental ethics discussions into a broader framework Gathered here are fifteen papers by an interdisciplinary group of scholars including ethicists marine scientists anthropologists economists geographers lawyers and activists From the Great Lakes to the Pacific Islands from the open sea to coastal areas the papers

cover a broad array of ethical issues and policy matters related to such topics as the valuation of marine life indigenous peoples knowledge and environmental stewardship endemic and exotic species aquaculture oil spills and species protection

Gulf Coast Soundings E. Paul Durrenberger, 1996 A fascinating study of the shrimp industry at the current time Adds both depth and breadth to our knowledge of maritime communities in the United States and beyond James Acheson author of *Lobster Gangs of Maine* A highly readable and long overdue critique of fisheries research and policy David Griffith author of *Jones s Minimal Low Wage Labor in the United States* *Marine Fisheries Review* , 2012 **Galveston** David G. McComb, 2010-01-01 A colorful history of the island city on Texas s Gulf Coast and its survival through times of piracy plague civil war and devastating natural disaster On the Gulf edge of Texas between land and sea stands Galveston Island Shaped continually by wind and water it is one of earth s ongoing creations where time is forever new Here on the shoreline embraced by the waves a person can still feel the heartbeat of nature And yet for all the idyllic possibilities Galveston s history has been anything but tranquil Across Galveston s sands have walked Indians pirates revolutionaries the richest men of nineteenth century Texas soldiers sailors bootleggers gamblers prostitutes physicians entertainers engineers and preservationists Major events in the island s past include hurricanes yellow fever smuggling vice the Civil War the building of a medical school and port raids by the Texas Rangers and always the struggle to live in a precarious location Galveston A History is an engrossing account that also explores the role of technology and the often contradictory relationship between technology and the city providing a guide to both Galveston history and the dynamics of urban development *Beyond Cannery Row* Carol Lynn McKibben, 2010-10-01 Presenting a nuanced story of women migration community industry and civic life at the turn of the twentieth century Carol Lynn McKibben s *Beyond Cannery Row* analyzes the processes of migration and settlement of Sicilian fishers from three villages in Western Sicily to Monterey California and sometimes back again McKibben s analysis of gender and gender roles shows that it was the women in this community who had the insight the power and the purpose to respond and even prosper amid changing economic conditions Vividly evoking the immigrants everyday experiences through first person accounts and detailed description McKibben demonstrates that the cannery work done by Sicilian immigrant women was crucial in terms of the identity formation and community development These changes allowed their families to survive the challenges of political conflicts over citizenship in World War II and intermarriage with outsiders throughout the migration experience The women formed voluntary associations and celebrated festas that effectively linked them with each other and with their home villages in Sicily Continuous migration created a strong sense of transnationalism among Sicilians in Monterey which has enabled them to continue as a viable ethnic community today

Trading Zones and Interactional Expertise Michael E. Gorman, 2010 A proposal for a new framework for fostering collaborations across disciplines addressing both theory and practical applications Cross disciplinary collaboration increasingly characterizes today s science and engineering research The problems and opportunities facing society do not

come neatly sorted by discipline Difficulties arise when researchers from disciplines as different as engineering and the humanities work together and find that they speak largely different languages This book explores a new framework for fostering collaborations among existing disciplines and expertise communities The framework unites two ideas to emerge from recent work in STS trading zones in which scientific subcultures each with its own language develop the equivalents of pidgin and creole and interactional expertise in which experts learn to use the language of another research community in ways that are indistinguishable from expert practitioners of that community A trading zone can gradually become a new area of expertise facilitated by interactional expertise and involving negotiations over boundary objects objects represented in different ways by different participants The volume describes applications of the framework to service science business strategy environmental management education and practical ethics One detailed case study focuses on attempts to create trading zones that would help prevent marine bycatch another investigates trading zones formed to market the female condom to women in Africa another describes how humanists embedded in a nanotechnology laboratory gained interactional expertise resulting in improved research results for both humanists and nanoscientists Contributors Brad Allenby Donna T Chen Harry Collins Robert Evans Erik Fisher Peter Galison Michael E Gorman Lynn Isabella Lekelia D Jenkins Mary Ann Leeper Roop L Mahajan Matthew M Mehalik Ann E Mills Bolko von Oetinger Elizabeth Powell Mary V Rorty Jeff Shrager Jim Spohrer Patricia H Werhane

Rise of Judicial Management in the U.S. District Court, Southern District of Texas, 1955-2000 Steven Harmon Wilson,2010-07-01 This is the first book length study of a federal district court to analyze the revolutionary changes in its mission structure policies and procedures over the past four decades As Steven Harmon Wilson chronicles the court s attempts to keep pace with an expanding diversifying caseload he situates those efforts within the social cultural and political expectations that have prompted the increase in judicial seats from four in 1955 to the current nineteen Federal judges have progressed from being simply referees of legal disputes to managers of expanding courts dockets and staffs says Wilson The Southern District of Texas offers an especially instructive model by which to study this transformation Not only does it contain a varied population of Hispanics African Americans and whites but its jurisdiction includes an international border and some of the busiest seaports in the United States Wilson identifies three areas of judicial management in which the shift has most clearly manifested itself Through docket and case management judges have attempted to rationalize the flow of work through the litigation process Lastly and most controversially judges have sought to

bring constitutionally flawed institutions into compliance through structural reform rulings in areas such as housing education employment and voting Wilson draws on sources ranging from judicial biography and oral history interviews to case files published opinions and administrative memoranda Blending legal history with social science this important new study ponders the changing meaning of federal judgeship as it shows how judicial management has both helped and hindered the resolution of legal conflicts and the protection of civil rights From Sail to Steam Richard V.
