

Introductory reading. For practice in this type of reading, relatively long texts are used, linguistically easy, containing at least 20-30% of redundant, secondary information. At the first stage of training, it is advisable to choose texts for this purpose that do not contain any new linguistic material, at the second stage, gradually increase its amount, but not exceed the specified limit, at the third stage, use any original text, the genre of which allows it.

Study reading. The most difficult texts for this stage of learning are selected, difficult both in content and in linguistic terms, since, in addition to teaching the student to read, working with the text has an accompanying educational task - to teach how to independently overcome possible difficulties using the supports available in the text.

Search reading. It is practiced in combination with other types. At the first stage, it is proposed to find information on a particular feature in the text that the students have already read. It is proposed to perform the same task on texts before reading them, at first - built mainly on sign language material, and then containing a better known one.
