Interactive Speech Systems Niels O. Bernsen, Hans Dybkjaer, Laila Dybkjaer, 2012-12-06 Designing Interactive Speech Systems describes the design and implementation of spoken language dialogue within the context of SLDS spoken language dialogue systems development Using an applications oriented SLDS developed through the Danish Dialogue project the authors describe the complete process involved in designing such a system and in doing so present several innovative practical tools such as dialogue design guidelines in depth evaluation methodologies and speech functionality analysis The approach taken is firmly applications oriented describing the results of research applicable to industry and showing how the development of advanced applications drives research rather than the other way around All those working on the research and development of spoken language services especially in the area of telecommunications will benefit from reading this book

Parallel Text Processing Jean Véronis, 2013-03-14 | This book evolved from the ARCADE evaluation exercise that started in 1995 The project's goal is to evaluate alignment systems for parallel texts i.e. texts accompanied by their translation Thirteen teams from various places around the world have participated so far and for the first time some ten to fifteen years after the first alignment techniques were designed the community has been able to get a clear picture of the behaviour of alignment systems Several chapters in this book describe the details of competing systems and the last chapter is devoted to the description of the evaluation protocol and results The remaining chapters were especially commissioned from researchers who have been major figures in the field in recent years in an attempt to address a wide range of topics that describe the state of the art in parallel text processing and use As I recalled in the introduction the Rosetta stone won eternal fame as the prototype of parallel texts but such texts are probably almost as old as the invention of writing Nowadays parallel texts are electronic and they are becoming an increasingly important resource for building the natural language processing tools needed in the multilingual information society that is currently emerging at an incredible speed Applications are numerous and they are expanding every day multilingual lexicography and terminology machine and human translation cross language information retrieval language learning etc

The Shape of Data in Digital Humanities Julia Flanders, Fotis Jannidis, 2018-11-02 Data and its technologies now play a large and growing role in humanities research and teaching This book addresses the needs of humanities scholars who seek deeper expertise in the area of data modeling and representation The authors all experts in digital humanities offer a clear explanation of key technical principles a grounded discussion of case studies and an exploration of important theoretical concerns The book opens with an orientation giving the reader a history of data modeling in the humanities and a grounding in the technical concepts necessary to understand and engage with the second part of the book The second part of the book is a wide ranging exploration of topics central for a deeper understanding of data modeling in digital humanities Chapters cover data modeling standards and the role they play in shaping digital humanities practice traditional forms of modeling in the humanities and how they have been transformed by digital approaches ontologies which seek to anchor meaning in digital humanities resources and how data models inhabit

the other analytical tools used in digital humanities research It concludes with a glossary chapter that explains specific terms and concepts for data modeling in the digital humanities context This book is a unique and invaluable resource for teaching and practising data modeling in a digital humanities context History of Intellectual Culture 1/2022 Charlotte A.

Lerg,Johan Östling,Jana Weiß,2022-10-24 With concepts of participation discussed in multiple disciplines from media studies to anthropology from political sciences to sociology the first issue of the new yearbook History of Intellectual Culture HIC dedicates a thematic section to the way knowledge can and arguably must be conceptualized as participatory Introducing and exploring participatory knowledge the volume aims to draw attention to the potential of looking at knowledge formation and circulation through a new lens and to open a dialogue about how and what concepts and theories of participation can contribute to the history of knowledge By asking who gets to participate in defining what counts as knowledge and in deciding whose knowledge is circulated modes of participation enter into the examination of knowledge on various levels and within multiple cultural contexts The articles in this volume attest to the great variety of approaches contexts and interpretations of participatory knowledge from the sociological projects of the Frankfurt School to the Uppsala based Institute for Race Biology from the Argentinian National Folklore Survey to current hashtag activism and Covid 19 archive projects HIC sees knowledge as rooted in social and political structures determined by modes of transfer and produced in collaborative processes The notion of participatory knowledge highlights in a compelling way how knowledge is rooted in cultural practices and social configurations **Dictionaries.
