Ulea, 2002 Applying systems theory to the comedies of Chekhov Balzac Kleist Moliere and Shakespeare A Concept of Dramatic Genre and the Comedy of a New Type Chess Literature and Film approaches dramatic genre from the point of view of the degree of richness and strength of a character s potential Its main focus is to establish a methodology for analyzing the potential from multidimensional perspectives using systems thinking The whole concept is an alternative to the Aristotelian plot based approach and is applied to an analysis of western and eastern European authors as well as contemporary American film This innovative study consists of three parts The first part is mostly theoretical proposing a new definition of the dramatic as a category linked to general systems phenomena and offering a new classification of dramatic genre In the second part Ulea offers a textual analysis of some works based on this new classification She analyzes comedies tragedies and dramas on the same or similar topics in order to reveal what makes them belong to opposite types of dramatic genre Additionally she considers the question of fate and chance with regard to tragedy and comedy from the point of view of the predispositioning theory In the third part Ulea explores an analysis of the comedy of a new type CNT Her emphasis is on the integration of the part and the whole in approaching the protagonist s potential She introduces the term quasi strong potential in order to reveal the illusory strength of protagonists of the CNT and to show the technique of CNT s analysis and synthesis Ulea s research begins with the notion of the comic traditionally considered synonymous with the laughable and attempts to approach it as independent from the laughable and laughter The necessity to do so is dictated by the desire to penetrate the enigmatic nature of Chekhov s comedy The result is *A Concept of Dramatic Genre and the Comedy of a New Type* Chess Literature and Film a completely new approach to potential and systems thinking which has never been a focus of dramatic theory before Such potential is the touchstone of the comic and comedy their permanent basic characteristic the heart and axis around which the comedic world spins      *Smart Sensing and Context* Paul Havinga, Maria Lijding, Nirvana Meratnia, Wegdam Maarten, 2006-10-24 This book constitutes the refereed proceedings of the First European Conference on Smart Sensing and Context EuroSSC 2006 held in Enschede Netherlands in October 2006 The 15 revised full papers and 14 revised short papers presented were carefully reviewed and selected from over 50 submissions      **Children's Literature in Translation** Jan Van Coillie, Jack McMartin, 2020-10-30 For many of us our earliest and most meaningful experiences with literature occur through the medium of a translated children s book This volume focuses on the complex interplay that happens between text and context when works of children s literature are translated what contexts of production and
