Ireland on Show Fintan Cullen, 2017-07-05 Looking past the apparent lack of a sustainable Irish display culture this book demonstrates that there is a very full story to tell of the way Ireland displayed its art from the late eighteenth to the early twentieth century Ireland on Show analyzes the impact of the display of art as a significant political and cultural feature in the make up of nineteenth century Ireland and in how Ireland was viewed beyond its own shores in particular in Great Britain and the United States Fintan Cullen directs much needed critical attention and analysis to a subject that has been largely overlooked from an Irish perspective This study moves beyond museums to address the range of art institutions in Irish cities that displayed art from the Royal Hibernian Academy founded in the 1820s to Hugh Lane's Municipal Art Gallery opened in Dublin in 1908 Throughout the book explores the battle between the display of a unionist ethos and a nationalist point of view a constant that resurfaces over the period By highlighting the tension between unionist and nationalist viewpoints Cullen uses the display of art to investigate the complexities of Irish cultural life before the founding of the Free State Archival Information Steven Fisher, 2004-03-30 From original manuscripts and letters to sound recordings and birth certificates archival information plays an increasingly important role in modern research Libraries and the Internet have made finding information on a wide range of topics faster and easier but not all information particularly from primary sources is available via local library branches or online resources Using archival information presents its own challenges

Materials are often located in many different places public or academic libraries government agencies historical societies or museums They are usually kept in secured areas where the public is restricted from browsing This definitive guide shows novice and experienced researchers how to find archival information It provides tips on how to use archival materials effectively and efficiently Topics covered include government archives science and technology collections military archives genealogical records business and corporate archives performing arts archives and sports collections Also provided is an overview of the world of archives including archival terminology how to contact archives and archival etiquette Whether searching for a noted author s original manuscripts trying to locate presidential papers or tracking down a repository of oral histories Archival Information is an indispensable reference
