particular human life out there in the universe Esoteric teachings affirm that life does indeed exist throughout the cosmos even within our own solar system on planets other than the Earth The author s metaphysics investigations together with his knowledge of the cutting edge of contemporary thought have uncovered fascinating details of the history of our planetary neighbours Life on the Moon reached fairly advanced levels of physical expression and evidence for this contention lies waiting to be discovered at deep subterranean levels A greater question mark exists over the possibility of complex life having been present on Mars The discovery of the remnants of microbial life on an ancient Martian meteorite will do little to resolve this quandary A few drops do not make a monsoon but they may foreshadow one This book is not science fiction There is a body of teaching on our planet very ancient and frequently tested termed the Gupta Vidya in India the Sibyl in ancient Rome the Kabbala Esoteric Buddhism the Ancient Wisdom of the Gnostics the Secret Doctrine of Theosophy etc which comments on the way in which nature and the cosmos unfolded Many descriptions of cosmogenesis flow as a common current through these teachings Because they are so often masked in mysticism in symbol and glyph in mythology and legend they are not easy to unravel Dr Baker in a brilliant way aided by images charts and tables presents these complex principles of Life in an easy to understand yet very detailed fashion Many scientific and esoteric references are quoted and several appendices are included which will help the reader through some sections of this work for which there are no simple analogies equivalents or colloquialisms available in the English language This book will change the way you think about life and the universe It will provide glimpses of the true destiny of humanity immortality *The Observer's Handbook* ,2004
