The Internet Strategy Handbook Lessons From The New Frontier Of Business:

The Internet Strategy Handbook Mary J. Cronin, 1996 The Internet Strategy Handbook is the first book to bring together the advice of managers who have spearheaded their company's Internet strategy. In close detail 10 Internet pioneers including managers from Dow Jones, Lockheed Martin, Genentech, and Digital show exactly how their companies have profited from their Internet connections. They examine the strategic impact of the Internet and the World Wide Web on their corporate strategies, analyze both their successes and failures, present cost-benefit analyses, and review key issues and emerging trends in successful Internet implementation such as secure commercial transactions, staff training, and competitive advantage. Managers evaluating the potential of the Internet for the first time, executives seeking to gain more value from existing Internet connections, consultants, entrepreneurs, and all Internet business users will refer to The Internet Strategy Handbook again and again. Its mix of strategic thinking, implementation advice, and model corporate applications will remain relevant long after the current Internet technical guides have become obsolete. Computing: Learning from the Past Arthur Tatnall, 2010-08-06 History of Computing Learning from the Past Why is the history of computing important Given that the computer as we now know it came into existence less than 70 years ago it might seem a little odd to some people that we are concerned with its history Isn't history about old things Computing of course goes back much further than 70 years with many earlier vices rightly being known as computers and their history is of course important It is only the history of electronic digital computers that is relatively recent History is often justified by use of a quote from George Santayana who famously said that Those who cannot remember the past are condemned to repeat it It is arguable whether there are particular mistakes in the history of computing that we should avoid in the future but there is some circularity in this question as the only way we will know the answer to this is to study our history This book contains papers on a wide range of topics relating to the history of computing written both by historians and also by those who were involved in creating this history The papers are the result of an international conference on the History of Computing that was held as a part of the IFIP World Computer Congress in Brisbane in September 2010 **Harvard Business School Core Collection** Baker Library, 1999 *Multiple Approaches to Intelligent Systems* Ibrahim F. Imam, Yves Kodratoff, Ayman El-Dessouki, Moonis Ali, 2004-05-19 We never create anything We discover and reproduce The Twelfth International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems has a distinguished theme It is concerned with bridging the gap between the academic and the industrial worlds of Artificial Intelligence AI and Expert Systems The academic world is mainly concerned with discovering new algorithms approaches and methodologies however the industrial world is mainly driven by profits and concerned with producing new products or solving customers problems Ten years ago the artificial intelligence research gap between academia and industry was very broad Recently this gap has been narrowed by the emergence of new fields and new joint research strategies in academia Among the new fields which contributed to the academic industrial convergence are knowledge representation machine learning searching reasoning distributed AI neural networks data mining intelligent agents robotics pattern recognition vision applications of expert systems and others It is worth noting that the end results of research in these fields are usually products rather than empirical analyses and theoretical proofs Applications of such technologies have found great success in many domains including fraud detection internet service banking credit risk and assessment telecommunication etc Progress in these areas has encouraged the leading corporations to institute research funding programs for academic institutes Others have their own research laboratories some of which produce state of the art research **Livingstontravels.com** Hernán Camps, 2002-12-16 Inhaltsangabe Abstract The use of electronic and other mechanized methods to exchange business transactions and other information through interconnected computers is not just a technological change but also a fundamental shift in mindset and in the way of doing business today There are great new opportunities for the e business which have not yet been explored Technology supports while does not limit the amount of opportunities but allows a whole

new set of competitive advantages in a global scenario where some of the rules of the game have change even though the most basic principles of business remain the same There is potential for acting globally with the support of the communications technologies Additionally the reduction of regulatory barriers in most of the countries stretches the limits of e commerce around the world However there are still barriers such as the paying mechanisms currencies or the fiscal and legal issues Even though the amount of opportunities that technology provides to the market place is surprising there is no technology that can help with out a clear idea of the business objectives to be achieved on the net Both tourism and Web based Electronic Commerce are growing and changing rapidly Two hundred and thirty percent increased in online holiday sales over 1997 Travel is currently the most purchased product online having surpassed computer equipment In 1999 US 5 billion was spent at travel web sites Research indicates this figure will increase six times to US 30 billion in 2001 Given these opportunities in the market place this project will set the tools to stimulate the creating process to test the idea and to work out its implications Livingstontravels com aims to be a niche player among the online travel agencies focusing mainly on satisfying the needs of young travelers with an interest and respect towards other cultures and resorts around the world Therefore Livingstontravels com will not only handle reservations but it will also offer some other bundled services which will help to understand better the visited country and establish contact with the native people through the web site virtual community before starting the trip Inhaltsverzeichnis Table of Contents SECTION 1 OVERVIEW1 1 INTRODUCTION WORLDWIDE INTERNET TRAVEL PORTAL2 2 PROBLEM FORMULATION3 3 METHODOLOGY5 SECTION 2 INDUSTRY ANALYSIS9 4 DEFINITION OF THE INDUSTRY10 4 1 VIRTUAL COMMUNITY INDUSTRY VS ONLINE TRAVEL *The Publishers Weekly* ,2001
