The Intraocular Implant Lens Development And Results With Special Reference To The Binkhorst Lens:

The Intraocular Implant Lens Development and Results with Special Reference to the Binkhorst Lens Marcel Eugène Nordlohne, 2013-11-11 Until 1 1 1972 DINKHORST inserted 170 iridocapsular lenses in 158 patients The first operation took place on 16 9 1965 Initially indication for the fitting of an iridocapsular lens was congenital or traumatic cataract in children since the extracapsular cataract extraction necessary at that age facilitated iridocapsular fixation DINKHORST 1967ac DINKHORST GODIN 1967d 1970b 1971b 1972d After 1970 MANSCHOT's histopathological findings see Chapter VIII and the desire to reduce dislocations and the development of ECD to a minimum induced DINKHORST to perform primary iridocapsular lens implant operations in cases with senile cataract as well This explains the decrease in the fitting of iris clip lens implants in favor of iridocapsular lens implants see Fig 39 The distribution of the patients' ages in these 170 cases is therefore quite different from that of the 677 iris clip lens implant operations see Fig 40 The technique of the iridocapsular lens implantation is described on page 59 Numerical data are shown in Fig 41 Noteworthy in this table are the following points 1 The average age at operation of 30.82 years which is very low compared with the 65-80 years for the iris clip lens series may be explained by the relatively large number of children in this series see Fig 40 The Intraocular Implant Lens Marcel Eugène Nordlohne, 1974

The History of Modern Cataract Surgery Marvin L. Kwitko, Charles D. Kelman, 1998 Surely the threat of blindness from whatever cause is an event faced by an ever growing segment of our aging population However when the cause was cataract formation over the centuries a definite treatment evolved and became available to help those afflicted with this problem from couching through crude extra capsular Graeffe knife extraction intra capsular cataract surgery and planned extra capsular surgery to phacoemulsification ultrasound or laser Doctors therefore recognized very early that there was one blinding condition which could be treated and in which vision could be improved

Lens Implantation P. Leonard, J. Rommel, 2012-12-06 The authors of this book are busy practical men with no particular barrow to push The text of the book includes a comprehensive review of all aspects of intraocular lens surgery including details of the design optics chemistry and sterilization of intraocular lenses Its value is enhanced by excellent illustrations and extensive tabulated references to the literature Accounts of patient acceptability are balanced against candid discussion of complications and their management The historical introduction recalls that in the early stages of development of the art over a period of 10 years two dozen different lens designs were proposed most claiming elimination of problems which had arisen with their predecessors Eventually nearly all disappeared from the scene In an age where every cataract surgeon has to determine a personal position on intraocular lens implantation the author's reflections on these matters are timely Intraocular lenses are neither a miracle nor a menace provided that personal decisions and preferences are carefully thought through and put into practice upon the basis of known facts and not upon the basis of fickle fashion and fad This book provides a background upon which the reader can evaluate in his own mind the validity of information provided by the manufacturers of various lens designs
