*Silent No More* Henry L. Feingold, 2007-01-03 Leading scholar and author of the celebrated five volume series *The Jewish People in America* Henry L. Feingold offers a fresh and inspiring look at the Russian Soviet Jewish emigration phenomenon. Haunted by its sense of failure during the Holocaust the Soviet Jewry movement set for itself an almost unrealizable goal of finding sanctuary for Jews from a hostile Soviet government. Working together with activists in Israel and Europe and with a remarkable group of refuseniks that had been denied the right to emigrate this courageous group mounted a relentless campaign lasting almost three decades. Although Feingold credits Israel with initiating the struggle for Soviet Jewry and fostering it within American Jewry he maintains that it was the actions of a secure and confident American Jewry that finally delivered the Jews from the Soviet Union. Feingold's mastery of detail and broadness of scope provide a prodigious and sweeping account of the American Jewish movement. He finds early roots of the effort in the American Jewish involvement with Jewish emigration in late Tsarist Russia. He highlights both the human dimension of the exodus and the complex international ramifications of the movement especially in the Middle East. *Silent No More* concludes by pondering the role of the movement's effective public relations campaign which focused on the human right of freedom of movement in hastening the collapse of the Soviet empire. Feingold's rigorous scholarship sheds light on an important yet rarely told episode in history one that will enliven further examination of the subject. This book will be of interest to scholars of American Jewish history the cold war Israeli studies and American ethnic and immigration history. **Seduction Spirit** Harvey Cox, 1973 A fusion of theology and autobiography. [A Journey into the Nonlinear World](#) Jüri Engelbrecht, 2024-07-30 This is a personal story about being involved in the study of nonlinear phenomena for more than half a century. The focus is on the development of ideas and the resulting knowledge. This is the visible part of research but much is usually hidden. The author describes how the ideas were generated and how an invisible college of friends and colleagues has emerged. The presentation is spiced by thoughts about the beauty of science and philosophical considerations on the complex world where nonlinear interactions play an important role. The book is in some sense a biography but not so much about the personal life of the author it is about science and its actors. Based on the author's experience in many European research centres and science policy institutions it reflects on the development of knowledge in nonlinear dynamics as well as science policy actions over the second half of the 20th century and the first quarter of the 21st century. Graduates and postgraduates interested in the progress of research will find the book particularly engaging.
