Padgett,Walter W. Powell,2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty Where do new alternatives new organizational forms and new types of people come from Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses John Padgett and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks They demonstrate that

novelty arises from spillovers across intertwined networks in different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community

Nation-States and Nationalisms Sinisa Malesevic, 2013-10-11 Despite many predictions made over the last two hundred years that nation states and nationalism are transient phenomena that will eventually fade away the historical record and contemporary events show otherwise Nationalism still remains the most popular potent and resilient ideological discourse and the nation state the only legitimate mode of territorial rule This innovative and concise book provides an in depth analysis of the processes involved in the emergence formation expansion and transformation of nation states and nationalisms as they are understood today Sinisa Malesevic examines the historical predecessors of nation states from hunting and gathering bands through city states to modernizing empires and explores the historical rise of organizational and ideological powers that eventually gave birth to the modern nation state The book also investigates the ways in which nationalist ideologies were able to envelop the microcosm of family kin residential and friendship networks Other important topics covered along the way include the relationships between nationalism and violence the routine character of nationalist experience and the impacts of globalization and religious revivals on the transformation of nationalisms and nation states This insightful analysis of
