Smith, 2017-07-12 Few would doubt that social science is in serious need of a new conceptual framework for the study of human organizations For some time now such a framework has been sought in the notion that societies are functional systems in which the individual sectors economy religion government and so on can be seen as subsystems dependent on each other and integrated within a whole But in spite of the major advances in research which modern systems theory has brought about it is based inevitably on a priori assumptions which are often at variance with the facts or require the facts to be interpreted in a special way to fit the theory In this book Smith puts forward an alternative framework by developing the concept of the corporation While most people nowadays think of corporations as large industrial enterprises Smith employs the term in its older Common Law sense of an established social unit By studying the components of social life in this way as discrete entities rather than as parts of a cohering system corporation theory is able to treat social phenomena empirically and so avoid the unverifiable ideology laden postulates of the traditional system model Corporations and Society is made up principally of key articles written by Smith over several decades To these have been added three newly written unpublished pieces of which the last a penetrating essay on the Caribbean is one of the longest in the book Covering such wide ranging topics as lineage systems government stratification law race relations and pluralism these essays by a distinguished anthropologist show how extensively and with what power of analysis the theory can be applied Foreign Behavioural Research on India Uday Narain Pareek, 1970 **The Oxford India Companion to Sociology and Social Anthropology** Veena Das, 2003 With fascinating entries on sociological and social anthropological research in India this volume presents a wealth of information including developments in the field important empirical work and its contributions to sociology as a whole It will appeal to all sociology students as well as to anyone with a broad interest in Asian studies Moving for Marriage Shruti Chaudhry, 2021-10-01 Shortlisted for the 2023 BASAS Book Prize presented by British Association for South Asian Studies Based on ethnographic fieldwork in a village in the north Indian state of Uttar Pradesh Moving for Marriage compares the lived experiences of women in regional marriages

that conform to caste and community norms within a relatively short distance with women in cross regional marriages that traverse caste linguistic and state boundaries and entail long distance migration within India By demonstrating how geographic distance and regional origins make a difference in these women s experiences Shruti Chaudhry challenges stereotypes and moral panics about cross regional brides who are brought from far away Indeed *Moving for Marriage* highlights the ways in which the post marital experiences of both categories of wives in this study their work and social relationships their sexual lives and childbearing decisions and their ability to access support in everyday contexts and in the event of marital distress are shaped by factors such as caste class poverty religion and stage in the life course In focusing on this Global South context Chaudhry makes novel arguments about the development of intimacy within marriages that are inherently unequal and even violent thereby offering an alternative to Euro American understandings of intimacy and women s agency
