demonstrate connoisseurship and taste which became important indicators of social standing The centres of cultural exchange and consumption were initially the great cities of Europe In the course of the eighteenth century however cultural consumption penetrated much deeper for example into the numerous residential and university towns in Germany where a growing number of functional elites and burghers met in coffee houses and reading societies attended the theatre and opera and performed orchestral and chamber music together Journals novels and letters were also crucial in forming consumer culture in provincial Germany as the German states were remote from the cultural life of England and France the material reality of London and Paris often passed as a literary construction to Germany It is against this background and stimulated by the research of John Brewer on England that the book systematically explores this field for the first time in regard to the Continent and especially to eighteenth century Germany Michael North focuses chapter by chapter on the new forms of entertainment concerts theatre opera reading societies travelling on the one hand and on the new material culture fashion gardens country houses furniture on the other At the centre of the discussion is the reception of English culture on the Continent and the competition between English and French fashions in the homes of German elites and burghers attracts special attention The book closes with an investigation of the role of cultural consumption for identity formation
