The Juárez Myth in Mexico Charles A. Weeks, 1987 The embodiment of a myth Benito Juárez Like many capitals the city of Mexico is a place of monuments large monuments small ancient monuments and new representational monuments and allegorical monuments each bearing a message from the past Among them is the Hemiciclo It stands in a spacious old beautiful park the Alameda Central where the young and old of the city still promenade on Sundays and holidays as people do in the plazas throughout the country and indeed as people do in many parts of the world Amid green trees and a great variety of flowers and shrubs and flanked by a semicircle of twelve doric columns of white Carrara marble stands the central pedestal of the Hemiciclo supporting the statues of three figures One statue represents a former president of the republic Benito Juárez who appears solemn and grim as a Roman proconsul administering justice Juárez the Lawgiver is seated and surrounding him are two allegorical figures also of marble one representing Glory who is placing a crown on Juárez's head and the other the Republic who stands behind resting her sword on the ground to signify the end of a gigantic struggle The letters of the pedestal read Al Benemerito Benito Juárez La Patria Many years have passed since 1910 when the Mexican government built and dedicated the Hemiciclo after a design by the architect Guillermo Heredia Like many other such monuments it is the embodiment of a myth In life Juárez offered little to the mythologizers he was never able to boast a military career he often impressed people as reserved or even impassive he stood a little over five feet with small hands and feet and dark staring eyes a coppery complexion that helped disguise a large scar across his face of Zapotec Indian parentage he was no striking figure He did however lead Mexican liberals in the 1850s and 1860s in their titanic struggle against formidable opposition both foreign and domestic and in the years since his death his worshipers have gathered at the Hemiciclo at his tomb or in many other places in Mexico sacred to his memory usually on anniversaries of his birth or death For them Juárez is in agreement with the golden inscription on the central pedestal of the Hemiciclo Benemerito de la Patria or even Benemerito de las Americas Development of a Juárez myth has had all the classic characteristics of myths and mythmaking especially the subjective view or image of a reality whether it be of an historical figure as in the case of Juárez an event an institution or even a geographical region Image or meaning ascribed to what is assumed to be a reality constitutes one of the main elements of myth and when manipulated to promote a cause assumes a reality of its own The apotheosis of Juárez projected a subjective view or image of the historical reality In all myths to be sure the assumed reality is a feature useful to an individual or a group

Nationalist Myths and Ethnic Identities Natividad Gutierrez, 2015-11 This timely study examines the processes by which modern states are created within multiethnic societies How are national identities forged from countries made up of peoples with different and often conflicting cultures languages and histories How successful is this process What is lost and gained from the emergence of national identities Natividad Gutierrez examines the development of the modern Mexican state to address these difficult questions She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state building Her investigation is distinguished by a critical consideration of cross cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history including interviews with contemporary indigenous intellectuals and students an analysis of public school textbooks and information gathered from indigenous organizations Gutierrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation descent and heroism These myths expressed and reinforced through the manipulation of

symbols public education and political discourse downplay separate ethnic identities and work together to articulate an overriding nationalist ideology The ideology girding the Mexican state has not been entirely successful however This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration

France, Mexico and Informal Empire in Latin America, 1820-1867 Edward Shawcross, 2018-02-06 This book explores French imperialism in Latin America in the nineteenth century taking Mexico as a case study The standard narrative of nineteenth century imperialism in Latin America is one of US expansion and British informal influence However it was France not Britain which made the most concerted effort to counter US power through Louis Napoleon's military intervention in Mexico begun in 1862 which created an empire on the North American continent under the Habsburg Archduke Ferdinand Maximilian Despite its significance to French and Latin American history this French imperial project is invariably described as an illusion an adventure or a mirage This book challenges these conclusions and places the French intervention in Mexico within the context of informal empire It analyses French and Mexican ideas about monarchy in Latin America responses to US expansion and the development of anti Americanism and pan Latinism the consolidation of Mexican conservatism and finally the collaboration of some Mexican elites with French imperialism An important dimension of the relationship between Mexico and France explored in the book is the transatlantic and transnational context in which it developed where competing conceptions of Mexico and France as nations the role of Europe and the United States in the Americas and the idea of Latin America itself were challenged and debated

State Governors in the Mexican Revolution, 1910-1952 Jürgen Buchenau, William H. Beezley, 2009-03-16 This unique book traces Mexico's eventful years from 1910 to 1952 through the experiences of its state governors During this seminal period revolutionaries destroyed the old regime created a new national government built an official political party and then discarded in practice the essence of their revolution In this tumultuous time governors some of whom later became president served as the most significant intermediaries between the national government and the people it ruled Leading scholars study governors from ten different states to demonstrate the diversity of the governors' experiences implementing individual revolutionary programs over time as well as the waxing and waning of strong governorship as an institution that ultimately disappeared in the powerful national regime created in the 1940s and 1950s Until that time the contributors convincingly argue the governors provided the revolution with invaluable versatility by dealing with pressing issues of land labor housing and health at the local and regional levels The flexibility of state governors also offered test cases for the implementation of national revolutionary laws and campaigns The only book that considers the state governors in comparative perspective this invaluable study offers a fresh view of regionalism and the Revolution
